Making Science Graphs and Interpreting Data

✱Scientific Graphs:

Most scientific graphs are made as **line** graphs. There may be times when other types would be appropriate, but they are rare.

The lines on scientific graphs are usually drawn either **straight** or **curved**. These "smoothed" lines do not have to touch all the data points, but they should at least get close to most of them. They are called **best-fit lines**.

In general, scientific graphs are not drawn in connect-the-dot fashion.

Here are two examples of best-fit graph lines.

One is drawn correctly, the other is not.
