Making Minimum Wage Helen J. Knowles, 2021-08-05 The US Supreme Court's 1937 decision in *West Coast Hotel v Parrish* upholding the constitutionality of Washington State's minimum wage law for women had monumental consequences for all American workers. It also marked a major shift in the Court's response to President Franklin D. Roosevelt's New Deal agenda. In *Making Minimum Wage*, Helen J. Knowles tells the human story behind this historic case. *West Coast Hotel v Parrish* pitted a Washington State hotel against a chambermaid, Elsie Parrish, who claimed that she was owed the state's minimum wage. The hotel argued that under the concept of freedom of contract, the US Constitution allowed it to pay its female workers whatever low wages they were willing to accept. Knowles unpacks the legal complexities of the case while telling the litigants' stories. Drawing on archival and private materials, including the unpublished memoir of Elsie's lawyer, C. B. Conner, Knowles exposes the profound courage and resolve of the former chambermaid. Her book reveals why Elsie, who in her mid-thirties was already a grandmother, was fired from her job at the Cascadian Hotel in Wenatchee and why she undertook the outsized risk of suing the hotel for back wages. Minimum wage laws are not an academic question or even a legal one. Elinore Morehouse Herrick, the New York director of the National Labor Relations Board, said in 1936: "Rather, they are a human problem." A pioneering analysis that illuminates the life stories behind *West Coast Hotel v Parrish*, as well as the case's impact on local, state, and national levels, *Making Minimum Wage* vividly demonstrates the fundamental truth of Morehouse Herrick's statement.

Mathematics for Social Justice Gizem Karaali, Lily S. Khadjavi, 2021-11-15 *Mathematics for Social Justice: Focusing on Quantitative Reasoning and Statistics* offers a collection of resources for mathematics faculty interested in incorporating questions of social justice into their classrooms. The book comprises seventeen classroom-tested modules featuring ready-to-use activities and investigations for college mathematics and statistics courses. The modules empower students to study issues of social justice and to see the power and limitations of mathematics in real-world contexts of deep concern. The primary focus is on classroom activities where students can ask their own questions, find and analyze real data, apply mathematical ideas themselves, and draw their own conclusions. Module topics in the book focus on technical content that could support courses in quantitative reasoning or introductory statistics. Social themes include electoral issues, environmental justice, equity, inequity, human rights, and racial justice, including topics such as gentrification, partisan gerrymandering, policing, and more. The volume editors are leaders of the national movement to include social justice material in mathematics teaching and jointly edited the earlier AMS/MAA volume *Mathematics for Social Justice: Resources for the College Classroom*. Gizem Karaali is Professor of Mathematics at Pomona College. She is a past chair of the Special Interest Group of the MAA on Quantitative Literacy (SIGMAA QL). She is one of the founding editors of *The Journal of Humanistic Mathematics*, senior editor of *Numeracy*, and an associate editor for *The Mathematical Intelligencer*; she also serves on the editorial board of the MAA's Classroom Resource Materials series. Lily Khadjavi is Professor and Chair of Mathematics at

Loyola Marymount University and is a past co chair of the Infinite Possibilities Conference In 2020 she was appointed by the California State Attorney General to the Racial and Identity Profiling Act Board which works with the California Department of Justice She currently serves on the editorial board of the MAA s Spectrum series and the Human Resources Advisory Committee for the Mathematical Sciences Research Institute in Berkeley
