Doug Lescoe, 2014-02-11 After producing superb software most companies fail to give adequate attention to making a User Interface UI of equal quality for their products leaving the end users to play annoying guessing games Thus a competitor with a similar product but with a higher quality UI can quickly decimate its rivals before they can react When Google was incorporated in September 1998 it was operating from a two car garage four months later PC Magazine named Google as the best search engine In the US Google is used about 67 percent of the time for on line searches Within two months after its release Apple sold 125 000 iPods in less than two years one million and by Christmas season 2005 a million units a week The iPod seized 65 percent of the market and became the generic name for a
