Mosaic Silver Edition Mp3:

Digital Medieval Dr Jeremy M Silver, 2014-01-10 Are we entering a Digital Medieval period or a digital renaissance In this new book Jeremy Silver traces the technological and economic story that leads from the music industry's losses to the global domination of Facebook Apple Google and Amazon He tells the story of how the recorded music industry struggled with change how entrepreneurs burst onto the scene and forced the pace and how ultimately the experiences of artists and music companies on the web set the tone for the rest of industry to follow With over twenty years experience of the music industry and the internet Silver is one of the digital industry pioneers His insights and insider account trace the evolution of music on the web from the cyberpunk underground to the mass market mainstream Silver argues that the walled garden business models of the major platform operators is leading consumers to a state of data lock in which is more like the dark ages than the renaissance He celebrates the potential in an enriched shared and open web while pointing to the perils of allowing the walls of the walled gardens to rise too high

Towards a Digital Renaissance Jeremy Silver, 2022-12-01 Towards a Digital Renaissance traces the excitement and optimism of the early internet the outsider cyberpunk ethic and open access But it also monitors the more complex but ultimately more commercialised online world of today a world dominated by corporate business in which many feel that surveillance has become overwhelming Jeremy Silver's involvement in various start ups both as CEO and investor led to his leadership of Digital Catapult Towards a Digital Renaissance examines the interplay between state and private financing in the digital sector It also argues for the internet's potential to transition from a medieval world of the GAFA big four Google Amazon Facebook and Apple closed and walled up like medieval city states to a digital renaissance based on the free exchange of ideas and an enabling metaverse made up of virtual reality and artificial intelligence that deepens our experience of reality rather than restricting or monitoring it
