The study of secondary data had its single great advantage of speed and cost. It was not possible to do a large number of interviews in the time and money available for this study. The study of secondary data was the most practical way to get the data needed for this study.

Abstract

Financial reports of business operations and performance were treated by accountants as the "black box," a closed world open to a few, that had no need for independent audits from outside. The common concern of corporations about the audit function—financial reporting coupled with audit internal and external auditing—was effectively solved. William Shattuck, now called the "father" of independent outside audits, the great man after the glass audit challenge was made self-evidently, wrote: "The Shattuck is an open statement to the business as to quality."
