Applications Lalit Kumar, Onesimo Mutanga, 2019-04-23 In a rapidly changing world there is an ever increasing need to monitor the Earth's resources and manage it sustainably for future generations Earth observation from satellites is critical to provide information required for informed and timely decision making in this regard Satellite based earth observation has

advanced rapidly over the last 50 years and there is a plethora of satellite sensors imaging the Earth at finer spatial and spectral resolutions as well as high temporal resolutions. The amount of data available for any single location on the Earth is now at the petabyte scale. An ever increasing capacity and computing power is needed to handle such large datasets. The Google Earth Engine (GEE) is a cloud based computing platform that was established by Google to support such data processing. This facility allows for the storage, processing and analysis of spatial data using centralized high power computing resources, allowing scientists, researchers, hobbyists and anyone else interested in such fields to mine this data and understand the changes occurring on the Earth's surface. This book presents research that applies the Google Earth Engine in mining, storing, retrieving and processing spatial data for a variety of applications that include vegetation monitoring, cropland mapping, ecosystem assessment and gross primary productivity among others. Datasets used range from coarse spatial resolution data such as MODIS to medium resolution datasets like Worldview 2, and the studies cover the entire globe at varying spatial and temporal scales.

Google Earth Engine and Artificial Intelligence for Earth Observation Vishakha Sood, Dileep Kumar Gupta, Sartajvir Singh, Biswajeet Pradhan, 2025-03-31

Google Earth Engine and Artificial Intelligence for Earth Observation: Algorithms and Sustainable Applications explores a wide range of transformative data fusion techniques of Artificial Intelligence (AI) technologies applied to Google Earth Engine (GEE) techniques. It includes a wide range of scientific domains that can utilize remote sensing and geographic information systems (GIS) through detailed case studies. This book delves into the challenges of AI-driven tools and technologies for Earth observation data analysis, offering possible solutions and directly addressing current and upcoming needs within Earth observation. Google Earth Engine and Artificial Intelligence for Earth Observation: Algorithms and Sustainable Applications is a useful reference for geospatial scientists, remote sensing experts and environmental scientists utilizing remote sensing to apply the latest AI techniques to data obtained from GEE for their research and teaching. Includes utilization of AI with GEE tools for a spectrum of scientific domains in remote sensing and geographic information systems (GIS) including natural hazard assessment, aquatic and hydrological applications and forest cover. Highlights the challenges and possible solutions for AI-driven tools and technologies for Earth observation data analysis. Includes detailed case studies showing specific considerations and exceptions for applications of AI in GEE for Earth observation.
