desktops and laptops that we increasingly rely on for our work and pleasure sometimes act up in frustrating ways. Fortunately, as exasperating as these hiccups may be, they are often predictable. In this guide, we attempt to present the difficulties you might encounter in the order in which you're likely to encounter them. If, for example, something goes amiss as you're installing the latest greatest version of OS X, you can be assured that you'll find it in the first chapter, Installation. If, later in the day, you press your Mac's power button and nothing good results, you'll find help in the next chapter, which addresses start-up issues, crashes, and freezes. Have a problem with hardware? Next, simply page on to Hardware Help. And so on through the System Issues Fixes, OS X's Applications, the Internet Networking, and Mac Maintenance chapters. And if, despite all of your diligent efforts, no solution is found, there are directions for what to do next in the Support Tricks chapter. But allow me to also extend a personal invitation to Macworld's Mac 911 forum, where I and other knowledgeable Mac users are eager to lend a helping hand.
