The Good Drone Kristin Sandvik, Maria Jumbert, 2016-08-25 While the military use of drones has been the subject of much scrutiny the use of drones for humanitarian purposes has so far received little attention As the starting point for this study it is argued that the prospect of using drones for humanitarian and other life saving activities has produced an alternative discourse on drones dedicated to developing and publicizing the endless possibilities that drones have for doing good Furthermore it is suggested that the Good Drone narrative has been appropriated back into the drone warfare discourse as a strategy to make war more human This book explores the role of the Good Drone as an organizing narrative for political projects technology development and humanitarian action Its contribution to the debate is to take stock of the multiple logics and rationales according to which drones are good with a primary objective to initiate a critical conversation about the political currency of good This study recognizes the many possibilities for the use of drones and takes these possibilities seriously by critically examining the difference the drones functionalities can make but also what difference the presence of drones themselves as unmanned and flying objects make Discussed and analysed are the implications for the drone industry user communities and the areas of crisis where drones are deployed
