

Step 1: Paint in sky. Notice Hokusai used the compliment (opposite) of blue which is orange in nature? It makes for great contrast. Here I used tints (whites) and shades (blacks) of orange to complete my background

Step 2: There will be 3 different layers of waves. Begin with mapping out your shapes of waves for this first layer. Use a medium blue and then fully dry your painting with a hairdryer. Hokusai created a famous icon of Japan in his background, Mt. Fuji. I painted in a famous icon from where I live, the Narragansett Towers.

Step 3: At this point you will mix 3 blue tones; a light, medium and dark blue. Stripe your waves to represent the lights and darks in water. Dry fully with hair dryer.

Now you will add an off-white to the tops of the waves. Hokusai had fun with this, creating curls and twists out of his foam. This gave his waves a very personal style. What can you come up with?

Step 4: With medium blue, map out the second/middle layer of waves. Add three tones of blue and stripe them. Dry it. Same as before you can now add an off-white color to the tops of the waves to create foam. Use hair dryer to fully dry this layer.

Step 5: With medium blue, map out the third and final layer of waves. Using 3 tones of blue, stripe the waves. Dry painting. Add off-white wave caps.

Step 6: Create a light grey-blue to add as shadows to the white surf. Add the shadows to the bottoms of the curls as if the sun hit the top of each curl and shadowed the bottom of each curl. Finally, dip toothbrush in off-white paint. Very lightly spritz your painting to represent sea-mist.

Making Waves William G. Martin, 2015-12-03 *Making Waves* unearths the successive worldwide waves of revolts rebellions and revolutions that have shaken and remade the world from the eighteenth century to the present It challenges us to rethink not only our limited conceptions of social movements but the very character and possibilities of social movements The authors show how successive outbursts of global social protest have undermined world capitalist orders and through both their successes and their failures provided the basis for long periods of stable capitalist rule across all the

zones of the world economy The surprises start in the Age of Revolution when the antisystemic wave of slave revolts that led to the Haitian Revolution is related to the systemic effects of their combination with the U S and French Revolutions The analysis comes up to the present when a wave of post 1989 movements points to quite divergent futures based as in the past on the search for alternatives to communities organized by capital accumulation nation states and the accelerating commodification and fragmentation of human needs identities and desires

Teaching Mathematics in Colleges and Universities Solomon Friedberg, 2001 Progress in mathematics frequently occurs first by studying particular examples and then by generalizing the patterns that have been observed into far reaching theorems Similarly in teaching mathematics one often employs examples to motivate a general principle or to illustrate its use This volume uses the same idea in the context of learning how to teach By analyzing particular teaching situations one can develop broadly applicable teaching skills useful for the professional mathematician These teaching situations are the Case Studies of the title Just as a good mathematician seeks both to understand the details of a particular problem and to put it in a broader context the examples presented here are chosen to offer a serious set of detailed teaching issues and to afford analysis from a broad perspective Each case raises a variety of pedagogical and communication issues that may be explored either individually or in a group facilitated by a faculty member Teaching notes for such a facilitator are included for each Case in the Faculty Edition The methodology of Case Studies is widely used in areas such as business and law The consideration of the mathematics cases presented here will help readers to develop teaching skills for their own classrooms
