The Borders of AIDS Karma R. Chávez, 2021-06-28 Winner of the 2022 Book of the Year Award sponsored by the Latina Latino Communication Studies Division of the National Communication Association Winner of the 2022 Diamond Anniversary Book Award sponsored by the National Communication Association Unpacks the exclusionary politics of AIDS and traces little known coalitions among affected communities As soon as US media and politicians became aware of AIDS in the early 1980s fingers were pointed not only at the gay community but also at other countries and migrant communities particularly Haitians as responsible for spreading the virus Evangelical leaders public health officials and the Reagan administration quickly capitalized on widespread fear of the new disease to call for quarantines immigration bans and deportations scapegoating and blaming HIV positive migrants even as the rest of the world regarded the US as the primary exporter of the virus In The Borders of AIDS Karma Ch vez demonstrates how such calls proliferated and how failure to impose a quarantine for HIV positive citizens morphed into the successful enactment of a complete ban on the regularization of HIV positive migrants which lasted more than twenty years News reports congressional records and AIDS activist archives reveal how queer groups and migrant communities built fragile coalitions to fight against the alienation of themselves and others asserting their capacity for resistance and resiliency Building on existing histories of HIV AIDS public health citizenship and immigration Ch vez establishes how politicians and public health officials treated different communities with HIV AIDS and highlights the work these communities did to resist alienation

**Interpretation and Extrapolation of Reproductive Data to Establish Human Safety Standards** K.S. Khera, H.C. Grice, D.J. Clegg, 2012-12-06 The International Life Sciences Institute (ILSI) is a scientific foundation that addresses critical health and safety issues of national and international concern ILSI promotes international cooperation by providing the mechanism for scientists from government industry and universities to work together on cooperative programs to generate

and disseminate scientific data The members and trustees of the institute believe that questions regarding health and safety are best resolved when scientists can examine and discuss issues as an independent body separate from the political pressures of individual countries and the economic concerns of individual companies Frequently meaningful assessment of the risk of a test substance is hindered by the inherent inconsistencies in the system The development and refinement of methods and systems to evaluate the safety of chemicals have evolved in a rapid and largely unplanned fashion Attempts to improve the system have mainly been directed toward broad general concerns with little attention being given to specific problems or issues A failure to resolve these problems has frequently resulted in increased testing costs and complications in the assessment and extrapolation of the results to humans Publicity surrounding toxicologic issues makes it difficult for governments to deal effectively with these problems In response to these difficulties ILSI has assembled highly qualified and renowned scientists from research institutes universities government and industry with relevant scientific knowledge and expertise regarding the issues that complicate risk assessment procedures
