*Business Research Methods* Dr. Lalit Prasad, Dr. Kunal Patil, Dr. Priyanka Mishra, 2025-01-18 Business Research Methods involves systematic data-driven approaches that help organizations make informed decisions by collecting, analyzing, and interpreting relevant data. The process typically includes defining a research problem, developing a research design, collecting data through surveys, interviews, or observations, and analyzing this data using statistical tools. Business research can be qualitative, focusing on understanding underlying reasons and motivations, or quantitative, aiming to quantify variables and predict outcomes. This book is divided into five chapters, each focusing on a crucial aspect of the research process. We begin with the identification of research problems, proceed through the formulation of hypotheses, research design, data collection, and analysis, and conclude with report writing. This progression ensures that readers gain a solid understanding of the entire research process, equipping them with the knowledge and skills needed to conduct their own research projects. To enhance learning and reinforce the concepts covered in each chapter, we have included a set of review questions at the end of each unit. These questions are categorized into multiple choice questions.
