Private Schools in the Kurdistan Region of Iraq Hassun, Hishyar, 2023-03-16 This book addresses the development and the functions of private schools in the Kurdistan Region of Iraq, a region that witnessed a huge change in the education system after its establishment in 1992, alongside with the rise of private schools. Numbers, private school choice, and profiles of private education providers are discussed based on empirical data. The data consist of using document analysis of 10 private education providers' websites to describe the profiles of private education providers, as well as a questionnaire (n=223) conducted with parents to find out the most important factors influencing the choice of private schools. The study shows that private schools in the Kurdistan Region of Iraq connect students to the globalized world through using English as the medium of instruction, which is considered the most important factor that parents consider in choosing private schools. The choice of private schools can be seen as a reflection for a globalized movement towards the privatization of education.
