Information and Conditioning

PROPER POSTURE & FORM

- Stand tall with a slight forward lean at the hips (not slouching) in a balanced forward position with rounded shoulders and upper back "locking" closed.
- Push your shoulders down and away from your ears. Relax a slight bend at the elbows.
- Hold the handles with a light grip and keep elbows relaxed.
- Keep your feet in contact with the pedals at all times. The foot should remain flat against the footplate, using the entire foot to push against the pedals.
- During both the forward and backward motion, avoid bouncing as this allows you to use gravity to help you move the pedals rather than your muscles resulting in a less effective workout.
- Throughout your pedal stroke to the edge of the pedal, you can place "heel" forward and "toe" on the back, depending on the stride length you prefer. Heel moving forward.
