Godzimirski,2018-09-21 This edited collection details and analyses the dramatic changes that the international political economy of energy has undergone in the past decade This change began with the increasing assertiveness of Russia when the oil price rose above the 100 mark in 2008 This combined with the rise of shale oil and gas made the USA all but self sufficient in terms of fossil fuels The collapse of the oil price in 2014 15 Saudi Arabia s new strategy of defending its market share and the increasingly tense and controversial relationship between the West and Russia all worked to further strengthen the geopolitical dimension of energy in Europe The global result is a world in which geopolitics play a bigger part than ever before the central question the authors of this volume grapple with is how the EU and European small states can deal with this Chapter 4 of this book is available open access under a CC BY 4 0 license at link springer com **Ford Transit** Peter Lee,2015-03-23 A commemorative history of fifty years of the iconic Ford Transit van from the launch of the first generation Transit in 1965 right up to the present day Covering the full range of Transit models and with over three hundred photographs including previously unpublished pictures from Ford s picture archive Ford Transit Fifty Years is an ideal resource for anyone with an interest in this world beating commercial vehicle Written by acknowledged Ford Transit expert Peter Lee the book covers the development era light commercial vehicles in the 1950s the Project Redcap prototypes and the first Transit Production and development of all eight generations and variants of Transits are also covered including custom vans camper vans minibuses and special vehicle options Specification guides awards sales figures are all included as well as marketing worldwide Finally there are interviews with designers engineers and Ford employees along with owners experiences The Transit has and continues to receive numerous awards voted International Van of the Year in 2001 and 2013 With the 2014 launch of the all new two tonne Transit and its pioneering technology this looks to be only the first fifty years of the Ford Transit story Journalism and the Political Felicitas Macgilchrist,2011-02-16 Journalism is often thought of as the fourth estate of democracy This book suggests that journalism plays a more radical role in politics and explores new ways of thinking about news media discourse It develops an approach

to investigating both hegemonic discourse and discursive fissures inconsistencies and tensions By analysing international news coverage of post Soviet Russia including the Beslan hostage taking Gazprom Litvinenko and human rights issues it demonstrates the re production of the common sense social order in which one particular area of the world is more developed civilized and democratic than other areas However drawing on Laclau Mouffe and other post foundational thinkers it also suggests that journalism is precisely the site where the instability of this global social order becomes visible The book should be of interest to scholars of discourse analysis journalism and communication studies cultural studies and political science and to anyone interested in positive discourse analysis and practical counter discursive strategies
