Covering the full range of Transit models and with over three hundred photographs including previously unpublished pictures from Ford's picture archive. Ford Transit Fifty Years is an ideal resource for anyone with an interest in this world-beating commercial vehicle. **Traffic and Transport Psychology** Talib Rothengatter, Raphael Denis Huguenin, 2004-09-08 This volume gives an overview of the trends in Traffic and Transport Psychology. It reflects the considerable development of the most important factors for driving a road vehicle and the variety of international research approaches. The first part contains basic approaches and integrated models, as well as general theories and their implementation into Traffic and Transport Psychology. The second part deals with the driver, especially cognition, performance, social and differential effects, and impairment. Important aspects are treated, such as speed, perception, reaction times, interaction, risk, acceptance, aggression, and gender differences. Special chapters refer to performance and fatigue. The third part focuses on safety, driver support, selection, and influencing drivers by enforcement, training, and programs for the rehabilitation of traffic offenders. Classic ergonomic methods are discussed, as well as modern telematic devices or trends regarding driver assessment. In the last part, current developments are presented in relation to better mobility and the protection of the environment. Questions are asked, such as whether we could reduce the use of cars, how travel behaviour can be modified, or to what extent the use of alternatives to motor vehicles benefits safety, as well as the environment. This work is not only important for psychologists; it should be read by all transport professionals interested in the application of psychology to traffic.
