Forecaster Guide To Tropical Meteorology:

Forecasters Guide to Tropical Meteorology (AWS TR 240 Updated) Colin S. Ramage, 2013-01-10 The urge to understand tropical meteorology has been driven by a variety of forces that include the devastation caused by tropical cyclones demands by military operations for example World War II the Marshall Islands weapons tests and the conflict in southeast Asia and the belief of influential mid latitude meteorologists that the tropics may hold the key to successful forecasts of global weather patterns and climate change As correctly forecast in the Preface to the first 1971 edition Forecasters Guide to Tropical Meteorology by Major Gary D Atkinson AWS TR 240 was used not only to train Air Weather Service meteorologists but also as a text for university courses It was even translated into Chinese Technological advances in the last 20 years especially in satellite based observations have not seriously affected views expressed in the first edition but have allowed them to be expanded and refined Both climatology and synoptic meteorology have benefitted while many hitherto obscure parts of the tropics have been exposed to the global eye This edition was prepared under contract with the Department of Meteorology University of Hawaii Satellite data and wide ranging research now allow the tropics to be treated more evenly and extensively than before Sections dealing with Africa the Americas and south and southwest Asia have been expanded Satellite picture illustrate tropical systems and processes

Forecasters Guide to Tropical Meteorology Colin S. Ramage, 1995 **Forecasters Guide to Tropical Meteorology. Updated**, 1995 AWS TR 240 by Maj Gary D Atkinson has served as the reference manual for USAF weather forecasting in the tropics since it was first published in 1971 Although it has endured for the past 20 years HQ Air Weather Service recognized the need for an update and contracted with tropical forecasting authority Dr Colin S Ramage to produce one Although a great deal of new material has been added to reflect new techniques and new technology it still covers the basic facts of climatology circulation and synoptic models with emphasis on analysis and forecasting techniques for the tropics Physical factors that control tropical circulations are discussed briefly The climatologies of pressure winds temperature humidity clouds rainfall and disturbances are presented in a form specially suitable for forecasters Analysis and forecasting of disturbances cyclones severe weather terminal weather etc are treated at length The uses of climatology and the interpretation and use of weather satellite imagery are emphasized Numerous figures adapted from the literature or prepared by the author illustrate all the essential facts and principles discussed A summary of the state of art and future outlook of tropical meteorology is included along with an extensive bibliography MM

Climate and circulation of the tropics S. Hastenrath, 2012-12-06 Tropical atmosphere and ocean are receiving increased attention in relation to the functioning of the global climate system the remarkable climatic variability in low latitudes and the associated manifold environmental and societal consequences Beyond the traditional emphasis of meteorology on weather analysis and forecasting there is a growing interest in the climate and large scale circulation of the tropics This book may serve as a text for graduate and upper division undergraduate students in meteorology and is also intended as a reference work for practicing meteorologists and researchers in the atmospheric oceanic and other environmental sciences I began writing this book in 1979 but the roots reach further back Early experiences in North Africa fuelled my curiosity about the low latitudes In 1960 I seized the opportunity to work in the National Meteorological Service of El Salvador in Central America My interest in the tropics continued after joining the University of Wisconsin in 1963 Field research brought me to the equatorial Pacific and many times to the tropical Americas and Africa This involved visits and correspondence with many weather services My acquaintance with Australasia and South Asia is limited to short study visits but includes continuous contacts with colleagues at key research institutions in India namely the India Meteorological Department the Indian Institute of Tropical Meteorology and Andhra University A guest semester at the University of the Witwatersrand in 1971 and related travels provided a perspective on the problems of Southern Africa *Facsimile Products*, 1979

Technical Publication PMR, Climate Dynamics of the Tropics S. Hastenrath, 2012-12-06 The first edition of my book *Climate and Circulation of the Tropics* was reasonably up to date to the middle of 1985 In a second printing in 1988 it was possible to complete a few literature references and to correct some misprints However vigorous research has taken place over the past five years in various areas of tropical climate dynamics especially in the atmosphere ocean mechanisms of climate anomalies climate prediction ocean circulation and paleoclimates Promising progress has also been made in the application of general circulation modelling to tropical climate problems In the present second edition named *Climate Dynamics of the Tropics* I have attempted to incorporate much of the recent work to late 1990 Chapters 8 and 9 have been essentially re written and major additions have been made to Chapters 4 and 12 in particular I would like to acknowledge the continued support by the U S National Science Foundation over the past five years B Parthasarathy Poona and H Lessmann San Salvador sent me updates of data series not easily accessible I have benefitted from discussions with numerous colleagues in the United States and overseas In the preparation of this second edition Marilyn Wolff patiently transferred my illegible hand written drafts onto word processor Dierk Polzin and Dan Skemp assisted me with the creation of the page masters and the subject index and Christopher Collimore with the author index Technical Report - Air Weather Service United States.
