challenges the very concept of pre colonial and explores methodologies on researching and writing history The reason for this dramatic change of focus is attributed in the introduction of the book to the student led rebellion that erupted following the RhodesMustFall campaign which started at the University of Cape Town on 9 March 2015 Key to the rebellion was the students opposition to what they dubbed colonial education and a clamour for among others a decolonised curriculum This Xhosa and Russian Folktales Bertie Neethling, 2019-07-23 The purpose of book is a direct response to this clarion call this publication is to indicate that Xhosa iintsomi folktales are structured in such a way that many links or commonalities emerge when a comparison between tales is made Orally transmitted literary forms had to endure much prejudice and were often not considered worthy of study However in many different cultures all over the world the concept of oral literature and its functioning still exists There are various forms of oral literature but one of the best known is the folktale Folklorist and formalist Vladimir Propp 1895 1970 aimed to describe the story structure of Russian folktales according to a linear sequence of the acts of the characters Using one hundred folktales he illustrated how the storylines of these tales are remarkably similar identical actions are often performed only by different characters. The somewhat surprising and obvious links between Propp's material and Xhosa iintsomi prompted the choice of Propp's model as the departure point for this comparative study Forty five Xhosa folktales were chosen because of their literary quality and suitability to Propp's methodology as a tool to organise the Xhosa data on the grounds of structural features that characterise this genre **New Trends in** Psychobiography Claude-Hélène Mayer, Zoltan Kovary, 2019-08-06 This volume offers insights into contemporary trends and perspectives in psychobiographical research It applys new theoretical and methodological frameworks and presents discourses on psychobiography from transdisciplinary backgrounds and various socio cultural contexts displaying the new state of the art new trends and themes in psychobiography The book outlines psychobiography s outstanding contribution to psychology from 36 internationally reputable authors It also presents the ideas of five outstanding psychobiographers through interview excerpts This book is a must for researchers lecturers and practitioners in the field of psychology and social sciences interested in the use of new psychological theories and methodologies in life span research Routledge Handbook of Critical Indigenous Studies Brendan Hokowhitu, Aileen Moreton-Robinson, Linda Tuhiwai-Smith, Chris Andersen, Steve Larkin, 2020-12-30 The Routledge Handbook of Critical Indigenous Studies is the first comprehensive overview of the rapidly expanding field of Indigenous scholarship The book is ambitious in scope ranging across disciplines and national boundaries with particular reference to the lived conditions of Indigenous peoples in the first world The contributors are all themselves Indigenous scholars who provide critical understandings of indigeneity in relation to ontology ways of being epistemology ways of knowing and axiology ways of doing with a view to providing insights into how Indigenous peoples and communities engage and examine the worlds in which they are immersed Sections include Indigenous Sovereignty Indigeneity in the 21st Century Indigenous Epistemologies The Field of Indigenous Studies Global

He argues that archive is both constructed in relation to and beset by ghosts ghosts of the living of the dead and of those not yet born and that attention should be paid to them Establishing a unique nexus between a deconstructive intersectionality and traditions of memory for justice in struggles against oppression from South Africa and elsewhere the book makes a case for a deconstructive praxis in today s archive Offering new ideas about spectrality banditry and archival activism Ghosts of Archive should appeal to those working in the disciplines of archival science information studies and psychology It should also be essential reading for those with an interest in social justice issues transitional justice history philosophy memory studies and postcolonial studies

Higher Education and Capacity Building in Africa Hanne Kirstine Adriansen, Lene Møller Madsen, Stig Jensen, 2015-11-06 Higher education has recently been recognized as a key driver for societal growth in the Global South and capacity building of African universities is now widely included in donor policies. The question is how do capacity building projects affect African universities researchers and students Universities and their scientific knowledges are often seen to have universal qualities therefore capacity building may appear straight forward Higher Education and Capacity Building in Africa contests such universalistic notions Inspired by ideas about the geography of scientific knowledge it explores what role

specific places and relationships have in knowledge production and analyses how cultural experiences are included and excluded in teaching and research Thus the different chapters show how what constitutes legitimate scientific knowledge is negotiated and contested In doing so the chapters draw on discussions about the hegemony of Western thought in education and knowledge production The authors own experiences with higher education capacity building and knowledge production are discussed and used to contribute to the reflexive turn and rise of auto ethnography This book is a valuable resource for researchers and postgraduate students in education development studies African studies and human geography as well as anthropology and history **Evaluating Indigenous African Tradition for Cultural Reconstruction and Mind Decolonization** Durodolu, Oluwole Olumide, Chisita, Collence T., Marutha, Ngoako Solomon, Familusi, Olumuyiwa Olusesan, 2024-08-22 Evaluating Indigenous African Tradition for Cultural Reconstruction and Mind Decolonization is edited by Oluwole O Durodolu and is an insightful book that challenges the derogatory portrayal of African Traditional Religion ATR and highlights the need for cultural reconstruction and mind decolonization.
