in their knowledge base for which further study is required Various techniques including the use of diagrams and tables are utilised to explain key facts As per the curriculum the book is organised into chapters in accordance with the syllabus allowing less familiar topics such as relevant aspects in urology and gynaecology to be covered Topics such as Gastrointestinal HPB Vascular Breast and Endocrine Surgery are understandably covered in greater depth given their common occurrence in the examination Questions are presented in a single best answer and extended matching item format mirroring those that the candidate will encounter during the examination This book is useful for candidates in both the early and late stages of their revision for the examination Early familiarity with the range and depth of topics may help guide further self directed learning Those in the latter stages of revision can use the questions to build confidence and reinforce their knowledge Each chapter is written by an authoritative author alongside the book editor to ensure it is relevant and informative for the reader
