

## Mineral Key

Use the following steps to identify a mineral:

1. Decide if the mineral is metallic or non-metallic based on its luster and streak.
2. If the mineral is non-metallic, decide if it is light or dark in color.
3. Find a mineral in the list with the same density and hardness as your sample.
4. Check that the other properties—crystal shape, color, streak, acid reaction—match.
