Slow Burn R. Jisung Park, 2025-07-29 How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates and how we might tackle them today It's hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe In *Slow Burn* R. Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs When wildfires blaze what happens to people downwind of the smoke When natural disasters destroy buildings and bridges what happens to educational outcomes Park explains how climate change operates as the silent accumulation of a thousand tiny conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities for upward mobility By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not Viewing climate change as a slow and unequal burn comes with an important silver lining It puts dollars and cents behind the case for aggressive emissions cuts and helps identify concrete steps that can be taken to better manage its adverse effects We can

begin to overcome our climate anxiety Park shows us when we begin to tackle these problems locally **IT Consultant Diploma - City of London College of Economics - 12 months - 100% online / self-paced** City of London College of Economics, Overview This course deals with everything you need to know to become a successful IT Consultant Content Business Process Management Human Resource Management IT Manager s Handbook Principles of Marketing The Leadership Information Systems and Information Technology IT Project Management Duration 12 months Assessment The assessment will take place on the basis of one assignment at the end of the course Tell us when you feel ready to take the exam and we ll send you the assignment questions Study material The study material will be provided in separate files by email download link **iDisrupted** Michael Baxter,2015-10-16 iDisrupted changing the human race forever Technology is set to transform the world Its likely impact is both terrifying and incredibly exciting We all need to understand the great changes that are just beginning to re shape the human domain and our daily lives Then we need to draw up plans There are few challenges more important This book is for People who want a job in ten years time Employers who want to hire the right talent for the future Students of business and business professionals who want to understand how technology will transform the commercial world Business leaders and shareholders who want the business they run or own to flourish and not get swept away Investors endeavouring to understand the possible impact of new technology and to place the right bets Policy makers needing to understand the potentially devastating impact of tech economics and tech politics to make the right decision for their country And above all those of us who care about the future of the human race Technologies to watch Robotics internet of things technologies for the promotion of a sharing economy artificial intelligence 3D printing stem cell research genome sequencing energy storage lasers solar power new materials virtual reality nanotechnology brain interfaces to computers and above al else the internet mixed with computers following the evolutionary trajectory described by Moore s Law [Executive MBA in IT - City of London College of Economics - 12 months - 100% online / self-paced](#) City of London College of Economics, Overview An MBA in information technology or a Master of Business Administration in Information Technology is a degree that will prepare you to be a leader in the IT industry Content Managing Projects and IT Information Systems and Information Technology IT Manager s Handbook Business Process Management Human Resource Management Principles of Marketing The Leadership Just What Does an IT Manager Do The Strategic Value of the IT Department Developing an IT Strategy Starting Your New Job The First 100 Days etc Managing Operations Cut Over into Operations Agile Scrum Project Management IT Portfolio Management The IT Organization etc Introduction to Project Management The Project Management and Information Technology Context The Project Management Process Groups A Case Study Project Integration Management Project Scope Management Project Time Management Project Cost Management Project Quality Management Project Human Resource Management Project Communications Management Project Risk Management Project Procurement Management Project Stakeholder Management 50 Models for Strategic Thinking English Vocabulary For
