Google SketchUp: The Missing Manual Chris Grover, 2009-05-22
If you want to learn to create 3D models using Google SketchUp, this Missing Manual is the ideal place to start. Filled with step-by-step tutorials, this entertaining, reader-friendly guide will have you creating detailed 3D objects, including building plans, furniture, landscaping plans, even characters for computer games, in no time. Google SketchUp: The Missing Manual offers a hands-on tour of the program with crystal-clear instructions for using every feature and lots of real-world examples to help you pick up the practical skills you need. Learn to use the basic tools, build and animate models, and place your objects in Google Earth. With this book, you will learn your way around the SketchUp workspace and explore the differences between working in 2D and 3D. Build simple 3D shapes, save them as reusable components, and use SketchUp's Outliner to show or hide them as you work. Tackle a complicated model building with lots of detail and discover timesaving tools for using many components. Animate the model by creating an interior walkthrough of your building. Dress up your model with realistic material shading and shadows and place it in Google Earth. It's easy to get started. Just download the program from Google.com and follow the instructions in this book. You'll become a SketchUp master in a jiffy.

Operational manual on indoor residual spraying World Health Organization, 2024-02-13
Indoor residual spraying (IRS) involves applying residual insecticide to potential vector resting sites on the interior surfaces of human dwellings or other buildings. The main aim of IRS is to kill vectors before they are able to transmit pathogens to humans. When carried out correctly, IRS has historically been shown to be a powerful intervention to reduce adult vector density and longevity for mosquitoes, sand flies, and triatomine bugs, and can reduce the transmission of vector-borne diseases. This operational manual is designed to provide guidance on the establishment, management, implementation, reporting, and evaluation of safe and effective IRS campaigns within the context of a locally adapted and sustainable vector control programme in line with the Global vector control response 2017-2030. It provides information according to current WHO recommendations and standards on IRS and recognizes that IRS can potentially target multiple diseases in areas where endophilic vectors coexist. The key audience for this document is vector-borne disease control programme managers and staff, as well as implementing or private sector partners at the national, provincial, state, or local levels who are responsible for the design, planning, or implementation of vector control operations.
