Liberal Democracy, Law and the Citizen Speaker Ian Cram, 2022-08-25 This book delivers an original theoretically informed analysis of the legal regulation of online speech Rejecting the narrow pluralism of elitist and deliberative accounts of the citizen's role in political discourse the book defends a participatory account of speech in non-deliberative settings The latter account of political pluralism best captures the republican democratic aspiration for popular ownership of the laws and the centrality of freedom to dissent in democratic theory The legal and policy implications for governments and social media platforms of this inclusive envisioning of public discourse are then elaborated upon In the digital world anyone with access to the internet can be a speaker Speech on public platforms has become democratised At the same time aspects of online speech are plainly problematic Concerns exist about disinformation fake news deep fakes weaponised speech and trolls Offensive speech and the polarising effects of robustly expressed political opinion are also troublesome These assorted downsides of democratised speech are said to undermine the integrity of democratic processes and institutions Public debate is distorted and coarsened and the electorate are misled How ought the liberal democratic state respond to these challenges The discussion is intended to be read by academics and researchers with interests in democratic theory digital communications and freedom of expression It offers a stimulating and distinctive contribution to debates about online speech

In the Shadow of the Bomb S. S. Schweber, 2007-01-07 How two charismatic exceptionally talented physicists came to terms with the nuclear weapons they helped to create In 1945 the United States dropped the bomb and physicists were forced to contemplate disquieting questions about their roles and responsibilities When the Cold War followed they were confronted with political demands for their loyalty and McCarthyism's threats to academic freedom By examining how J Robert Oppenheimer and Hans A Bethe two men with similar backgrounds but divergent aspirations and characters struggled with these moral dilemmas one of our foremost historians of physics tells the story of modern physics the development of atomic weapons and the Cold War Oppenheimer and Bethe led parallel lives Both received liberal educations that emphasized moral as well as intellectual growth Both were outstanding theoreticians who worked on the atom bomb at Los Alamos Both advised the government on nuclear issues and both resisted the development of the hydrogen bomb Both were in their youth sympathetic to liberal causes and both were later called to defend the United States against

Soviet communism and colleagues against anti Communist crusaders Finally both prized scientific community as a salve to the apparent failure of Enlightenment values Yet their responses to the use of the atom bomb the testing of the hydrogen bomb and the treachery of domestic politics differed markedly Bethe who drew confidence from scientific achievement and integration into the physics community preserved a deep integrity By accepting a modest role he continued to influence policy and contributed to the nuclear test ban treaty of 1963 In contrast Oppenheimer first embodied a new scientific persona the scientist who creates knowledge and technology affecting all humanity and boldly addresses their impact and then could not carry its burden His desire to retain insider status combined with his isolation from creative work and collegial scientific community led him to compromise principles and ironically to lose prestige and fall victim to other insiders S S Schweber draws on his vast knowledge of science and its history in addition to his unique access to the personalities involved to tell a tale of two men that will enthrall readers interested in science history and the lives and minds of great thinkers

Nectar #3 Babaji Bob Kindler, Lex Hixon, Swami Sunirmalananda, Swami Ranganathananda, Annapurna Sarada, Rabbi Ariel Stone-Halpern, Rabbi Rami Shapiro, Llewellyn Vaughn Lee, 2001-06-07 This installment of Nectar is dedicated to the auspicious boon and blessing of sacred scripture In Vedic tradition scripture is seen as something revealed rather than written wisdom inherent in Consciousness instead of something created by the mind It is nitya anadi and apaurasheya eternally present and accessible without beginning or end and not ascribable to human authorship Other viewpoints consider that these sacred teachings come from Ishvara God's presence in the universe or that the actual knowledge comes from God while the language is supplied by luminaries Finally one school believes that scripture is only a product of the finest human intellect Whatever the case may be these teachings are very valuable to all who would cross the ocean of birth and death samsara and establish themselves in their undying and immortal essence

A Guided Science Jaan Valsiner, 2017-07-05

That sciences are guided by explicit and implicit ties to their surrounding social world is not new Jaan Valsiner fills in the wide background of scholarship on the history of science the recent focus on social studies of sciences and the cultural and cognitive analyses of knowledge making The theoretical scheme that he uses to explain the phenomena of social guidance of science comes from his thinking about processes of development in general his theory of bounded indeterminacy and on the relations of human beings with their culturally organized environments Valsiner examines reasons for the slow and nonlinear progress of ideas in psychology as a science at the border of natural and social sciences Why is that intellectual progress occurs in different countries at different times Most responses are self serving blinders for presenting science as a given rather than understanding it as a deeply human experience For Valsiner scientific knowledge is cultural at its core Major changes have occurred in contemporary sciences collective authorship fragmentation of knowledge into small quickly published and equally quickly retractable journal articles and the counting of numbers of such articles by institutions as if

that is a measure of scientific productivity Scientists are inherently ambivalent about the benefit of these changes for the actual development of knowledge There is a gradual takeover of the domain of scientific knowledge creation by other social institutions with vested interests in defending and promoting knowledge that serves their social interests Sciences are entering into a new form of social servitude *ugc net political science unit 1 book with 400 question answers (theory + mcqs) as per updated syllabus* DIWAKAR EDUCATION HUB ,2023-02-06 ugc net political science unit 1 book with 400 question answers theory mcqs as per updated syllabus
