

The Scientific Revolution: Astronomy

In the A.D. 150s, the astronomer Ptolemy stated that Earth was the center of the universe. The sun and the planets, according to Ptolemy, moved around Earth. Ptolemy's theory is called the **geocentric**, or "Earth-centered," theory. The Greek word for Earth is *geo*. People believed this theory for many centuries.

TASK:

1. Who was Ptolemy? What was his theory?
2. Why do you think people believed in the geocentric theory?
3. Using the materials available to you, create the Geocentric Theory.

COPERNICUS

During the early 1500s, Polish scientist Nicolaus Copernicus began to abandon Ptolemy's geocentric theory (earth-centered theory). Instead, he argued that the sun was the center of the universe. Copernicus developed the **heliocentric**, or "sun-centered," theory. *Helio* is the Greek word meaning "sun". Copernicus realized that his theory explained many of the then-known facts about astronomy.

When Copernicus's theory was published in 1543, people paid little attention. The theory seemed to deny what people's senses told them. Anyone could "see" that the sun and planets moved around the Earth. Anyone could "feel" that solid Earth did not move.

NICOLAUS COPERNICUS

Nicolaus Copernicus, the great Polish scientist, is viewed today as the founder of modern astronomy. His heliocentric theory demonstrated that the earth is a moving planet and that it revolves around the sun. Copernicus became a symbol of the new ideas and approaches that brought about the Scientific Revolution.

Copernicus had neither the instruments nor the mathematics to prove his theory. Proof came later with the work of two other scientists.

QUESTIONS:

1. WHAT DID COPERNICUS ARGUE?
2. WHY DO YOU THINK PEOPLE DID NOT ACCEPT COPERNICUS' MODEL, BACK THEN?
3. HOW DID COPERNICUS CHALLENGE TRADITIONAL THOUGHT?
4. TASK: Using the materials provided create the Heliocentric model.

Friedman, 2010-09-02 This book presents a provocative debate between parapsychological advocates who claim that Western science's worldview is incomplete and counteradvocates who insist that parapsychological data is either spurious or can be explained by standard scientific principles Despite ongoing and repeated attempts to prove or disprove the existence of parapsychological events there are still no conclusive findings and certainly no consensus across the worldwide community of scholars scientists and proponents of psychic phenomena Still there is no shortage of information about this fascinating topic to allow everyone to draw their own conclusions This book has been expressly written to make each chapter and topic accessible to a general audience despite containing a vast amount of theoretical material The book is organized into two parts in the first section proponents of the validity of parapsychological data and critics who reject that validity state their respective positions In the second part each group responds to each others statements in the form of a debate Other experts from the United States as well as from Australia and Great Britain provide overviews and conclusions *Readers' Guide to Periodical Literature*, 1911

The Art and Science of Making the New Man in Early 20th-Century Russia Yvonne Howell, Nikolai Kremontsov, 2021-12-02 The idea that morally mentally and physically superior new men might replace the currently existing mankind has periodically seized the imagination of intellectuals leaders and reformers throughout history This volume offers a multidisciplinary investigation into how the new man was made in Russia and the early Soviet Union in the first third of the 20th century The traditional narrative of the Soviet new man as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here The book focuses on the interplay between the rapidly developing experimental life sciences such as biology medicine and psychology and countless cultural products ranging from film and fiction dolls and museum exhibits to pedagogical projects sculptures and exemplary agricultural fairs With contributions from scholars based in the United States Canada the UK Germany and Russia the picture that emerges is emphatically more complex contradictory and suggestive of strong parallels with other new man visions in Europe and elsewhere In contrast to previous interpretations that focused largely on the apparent disconnect between utopian new man rhetoric and the harsh realities of everyday life in the Soviet Union this volume brings to light the surprising historical trajectories of new man visions their often obscure origins acclaimed and forgotten champions unexpected and complicated results and mutual interrelations In short the volume is a timely examination of a recurring theme in modern history when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind
