Chapter 1: Intro to the Scientific Revolution

The Renaissance came about because of a change in the way of thinking. In an effort to learn, people began to want to understand the world around them. This study of the world and how it works was the start of a new age of science in the 1600s.

The explosion of artistic and poetic creativity that occurred in Italy during the Renaissance also gave rise to great curiosity about the way the world worked.

What Renaissance philosophy encouraged study of worldly things?

1. What did the Renaissance help bring about in Europe in the 1600s?

Science and art were very closely related during this time. Great artists, such as Leonardo da Vinci, would study anatomy to better understand the body so they could create better paintings and sculptures. Artifacts such as Filippo Brunelleschi made advances in math in order to design buildings. The true geniuses of the time were often both artists and scientists. They were both considered talents of the true Renaissance man.

During the Renaissance, many artists also became highly educated scientists that studied the world in order to be able to make better paintings. One of the things they studied was the anatomy (structure) of the human body by cutting open dead bodies.

What institution do you think might have a problem with the slicing open of dead bodies? Why?

2. How did artists during the Renaissance use scientific study?
