Guided Discovery

Is about...

+10

The teacher presents students with an example of a specific topic and guides students to an understanding of that topic.

Main idea

Planning

Prior to the lesson identify the topic, specify learning objectives, and prepare examples and non-examples. Examples should be high-quality and should contain a variety. The context for examples should also be planned in advance.

Main idea

Implementing

Phase 1- The teacher introduces the lesson and attempts to gain the attention of students.
 Phase 2- The teacher shows the students examples and asks them to make observations and compare the examples.
 Phase 3- The teacher asks more specific questions that are designed to lead students to an understanding of the concept or generalization.
 Phase 4- The teacher guides students to a definition of the concept or a statement of the generalization. The students apply their understanding of the new context.

Main idea

Assessment

Formative- The teacher can assess students by listening to how they answer the questions that she asks.
 Summative- Teachers can formally assess students by having them create examples of what they learned during the lesson.

Main idea

Motivation

Students get a chance to take control of their learning. They don't have to listen to a lecture, but rather form their own understanding by exploring the topic. The retention of information can be rewarding for those that normally forget everything that they hear in a lecture.

So what? What is important to understand about this?

This model will take up more time, but guided learning results in a deeper understanding than lectures and explanations.

Early Childhood Special Education Programs and Practices Karin Fisher, Kate Zimmer, 2024-06-01 Early Childhood Special Education Programs and Practices is a special education textbook that prepares pre and in service teachers with the knowledge, skills, and dispositions to deliver evidence-based instruction to promote positive academic and behavioral outcomes for young children, prekindergarten through second grade, with development delays and/or disabilities. Early Childhood Special Education Programs and Practices intertwines inclusive early childhood practices by using real-life anecdotes to illustrate evidence-based practices, EBP, and procedures. The authors, experts in their fields, emphasize high-leverage practices, EBP, and culturally sustaining pedagogy and align them with the practices, skills, and competencies recommended by the Council for Exceptional Children's Division for Early Childhood. Families, administrators, and teacher educators of pre and in service early childhood special education and general early childhood education programs alike will find this book useful. Included in Early Childhood Special Education Programs and Practices are:

- An overview of early childhood and development of children ages 4 to 8
- Strategies for relationship building with students, families, communities, and school personnel
- Tips on creating a caring and positive classroom environment
- Chapters devoted to evidence-based instruction in core subjects of reading and writing, mathematics, science, and social studies for students with disabilities in pre-K to second grade
- More than 80 images, photos, tables, graphs, and case studies to illustrate recommended practices

Also included with the text are online supplemental materials for faculty use in the classroom, consisting of an Instructor's Manual and PowerPoint slides. Created with the needs of early childhood special educators in mind, Early Childhood Special Education Programs and Practices provides pre and in service teachers with the skills and practices they need to serve young children, their families, and communities across settings.

Empowering Online Learning Curtis J. Bonk, Ke Zhang, 2009-10-29 This is an essential resource for anyone designing or facilitating online learning. It introduces an easy, practical model, R2D2 (read, reflect, display, and do), that will show online educators how to deliver content in ways that benefit all types of learners: visual, auditory, observational, and kinesthetic, from a wide variety of backgrounds and skill levels. With a solid theoretical foundation and concrete guidance and examples, this book can be used as a handy reference, a professional guidebook, or a course text. The authors intend for it to help online instructors and instructional designers, as well as those contemplating such positions, design, develop, and deliver learner-centered online instruction. Empowering Online Learning has 25 unique activities for each phase of the R2D2 model, as well as summary tables helping you pick and choose what to use whenever you need it. Each activity lists a description, skills addressed, advice, variations, cost, risk, and time index, and much more. This title is loaded with current information about emerging technologies.

e.g. simulations, podcasts, wikis, blogs and the Web 2.0. With a useful model, more than 100 online activities, the latest information on emerging technologies, hundreds of quickly accessible Web resources and relevance to all types and ages of learners, *Empowering Online Learning* is a book whose time has come.
