

CHAPTER 19 ACTIVE READING WORKSHEETS**POPULATIONS****Section 19-3: Human Population Growth**

Read the passage below, which covers topics from your textbook.
Answer the questions that follow.

Today about 20 percent of the world's population live in developed countries. This category includes all of the world's modern, industrialized countries, such as the United States, Japan, Germany, France, the United Kingdom, Australia, Canada, and Russia. On average, people in developed countries are better educated, healthier, and live longer than the rest of the world's population. Population growth rates in developed countries are very low—about 0.003 per capita. The populations of some of these countries, such as Russia, Germany, and Italy, are shrinking because death rates exceed birthrates.

Most people (about 80 percent of the world's population) live in developing countries, a category that includes most countries in Asia, Central America, South America, and Africa. In general, these countries are poorer than the more-developed countries, and their populations are growing much faster—at a growth rate of about 0.015 per capita.

Fill in the blank to complete each sentence.
