Hegel Biographies Autobiographies:

Hegel Terry Pinkard, 2001-06-18 One of the founders of modern philosophical thought Georg Wilhelm Friedrich Hegel 1770 1831 has gained the reputation of being one of the most abstruse and impenetrable of thinkers This major biography of Hegel offers not only a complete account of the life but also a perspicuous overview of the key philosophical concepts in Hegel's work in a style that will be accessible to professionals and non professionals alike Terry Pinkard situates Hegel firmly in the historical context of his times The story of that life is of an ambitious powerful thinker living in a period of great tumult dominated by the figure of Napoleon The Hegel who emerges from this account is a complex fascinating figure of European modernity who offers us a still compelling examination of that new world born out of the political industrial social and scientific revolutions of his period

Hegel Horst Althaus, 2014-02-27 This accessible and highly readable book is the first full length biography of Hegel to be published since the largely outdated treatments of the nineteenth century Althaus draws on new historical material and scholarly sources about the life and times of this most enigmatic and influential of modern philosophers He paints a living portrait of a thinker whose personality was more complex than is often imagined and shows that Hegel's relation to his revolutionary times was also more ambiguous than is usually accepted Althaus presents a broad chronological narrative of Hegel's development from his early theological studies in Tübingen and the associated unpublished writings profoundly critical of the established religious orthodoxies He traces Hegel's years of philosophical apprenticeship with Schelling in Jena as he struggled for an independent intellectual position up to the crowning period of influence and success in Berlin where Hegel appeared as the advocate of the modern Prussian state Althaus tells a vivid story of Hegel's life and his intellectual and personal crises drawing generously on the philosopher's own words from his extensive correspondence His central role in the cultural and political life of the time is illuminated by the impressions and responses of his contemporaries such as Schelling Schleiermacher and Goethe This panoramic introduction to Hegel's life work and times will be a valuable resource for scholars students and anyone interested in this towering figure of philosophy

Hegel Klaus Vieweg, 2025-10-07 A monumental new biography of a pivotal yet poorly understood pioneer in modern philosophy When a painter once told Goethe that he wanted to paint the most celebrated man of the age Goethe directed him to Georg Wilhelm Friedrich Hegel Hegel worked from the credo To philosophize is to learn to live freely While he was slow and cautious in the development of his philosophy his intellectual growth was like an odyssey of the mind and contrary to popular belief his life was full of twists and turns suspense and even danger In this landmark biography the philosopher Klaus Vieweg paints a new picture of the life and work of the most important representative of German idealism His vivid portrait provides readers an intimate account of Hegel's times and the milieu in which he developed his thought along with detailed clear sighted analyses of Hegel's four major works What results is a new interpretation of Hegel through the lens of reason and freedom Vieweg draws on extensive archival research that has brought to light a wealth of hitherto undiscovered documents

and handwritten notes relating to Hegel's work touching on Hegel's engagement with the leading thinkers and writers of his age Kant Fichte Schelling Holderlin and others Combatting clichés and misunderstandings about Hegel Vieweg also offers a sustained defense of the philosopher's more progressive impulses Highly praised upon its release in Germany as having set the new biographical standard this monumental work emphasizes Hegel's relevance for today depicting him as a vital figure in the history of philosophy

The Philosophy of History Georg W. F. Hegel, 2007-06-01 Purchase of this book includes free trial access to www.millionbooks.com where you can read more than a million books for free This is an OCR edition with typos Excerpt from book Spirit and in the History of the World regard everything as only its manifestation we have in traversing the past however extensive its periods only to do with what is present for philosophy as occupying itself with the True has to do with the eternally present Nothing in the past is lost for it for the Idea is ever present Spirit is immortal with it there is no past no future but an essential now This necessarily implies that the present form of Spirit comprehends within it all earlier steps These have indeed unfolded themselves in succession independently but what Spirit is it has always been essentially distinctions are only the development of this essential nature The life of the ever present Spirit is a circle of progressive embodiments which looked at in one aspect still exist beside each other and only as looked at from another point of view appear as past The grades which Spirit seems to have left behind it it still possesses in the depths of its present

GEOGRAPHICAL BASIS OF HISTORY Contrasted with the universality of the moral Whole and with the unity of that individuality which is its active principle the natural connection that helps to produce the Spirit of a People appears an extrinsic element but inasmuch as we must regard it as the ground on which that Spirit plays its part it is an essential and necessary basis We began with the assertion that in the History of the World the Idea of Spirit appears in its actual embodiment as a series of external forms each one of which declares itself as an actually existing people This existence falls under the category of Time as well as Space in the way of natural existence and the special principle which every world historical people embodies has this principle at the same time as a nation

Hegel's Logic Clark Butler, 1996-12-18 Clark Butler presents an innovative analysis of Hegel's most challenging work in Hegel's Logic the first major English language treatment of Hegel's Science of Logic to appear in nearly fifteen years Although earlier commentators on the Logic have considered standard analytical philosophy and with it modern logic in opposition to Hegel Butler views it as a legitimate approach in terms of which Hegel needs to be understood This interpretation allows him to address the rigor of Hegel's thought on several levels as at once an exercise in purely conceptual redefinition and a full bodied work in metaphysical ontology and even theology The result is an account of the Logic intelligible to analytical philosophers as well as non specialists

Autobiographies of Others Lucia Boldrini, 2012-08-21 In this volume Boldrini examines heterobiography, the first-person fictional account of a historic life. Boldrini shows that this mode is widely employed to reflect critically on the historical and philosophical understanding of the human on individual identity and on the power relationships that define the subject. In such texts the grammatical first person becomes the site of an encounter, a stage where the relationships between historical, fictional, and authorial subjectivities are played out and explored in the double I of author and narrating historical character of fictional narrator and historical person. Boldrini considers the ethical implications of assuming another's first-person voice and the fraught issue of authorial responsibility. Constructions of the body are examined in relation to the material evidence of the subject's existence. Texts studied include Malouf's *An Imaginary Life*, Carey's *True History of the Kelly Gang*, Ondaatje's *The Collected Works of Billy the Kid*, Adair's *The Death of the Author*, Banti's *Artemisia*, Vázquez Montalbán's *Autobiografía del general Franco*. Also discussed among others Yourcenar's *Memoirs of Hadrian*, Tabucchi's *The Last Three Days*, Fernando Pessoa, Guimarães Rosa, Bartlett's *Una habitación ajena*, *A Room of Someone Else's*.

Encyclopedia of the Romantic Era, 1760-1850 Christopher John Murray, 2013-05-13 In 850 analytical articles, this two-volume set explores the developments that influenced the profound changes in thought and sensibility during the second half of the eighteenth century and the first half of the nineteenth century. The Encyclopedia provides readers with a clear, detailed, and accurate reference source on the literature, thought, music, and art of the period, demonstrating the rich interplay of international influences and cross-currents at work and to explore the many issues raised by the very concepts of Romantic and Romanticism.

Postcolonial Theory and Autobiography David Huddart, 2008-04-18 Cultural theory has often been criticized for covert Eurocentric and universalist tendencies. Its concepts and ideas are implicitly applicable to everyone, ironing over any individuality or cultural difference. Postcolonial theory has challenged these limitations of cultural theory, and Postcolonial Theory and Autobiography addresses the central challenge posed by its autobiographical turn. Despite the fact that autobiography is frequently dismissed for its Western masculine bias, David Huddart argues for its continued relevance as a central explanatory category in understanding postcolonial theory and its relation to subjectivity. Focusing on the influence of poststructuralist theory on postcolonial theory and vice versa, this study suggests that autobiography constitutes a general philosophical resistance to universal concepts and theories. Offering a fresh perspective on familiar critical figures like Edward W. Said and Gayatri Chakravorty Spivak by putting them in the context of readings of the work of Jacques Derrida, Gilles Deleuze, and Alain Badiou, this book relates the theory of autobiography to expressions of new universalisms that, together with postcolonial theory, rethink and extend norms of experience, investigation, and knowledge.

Denzin, 1989-09 Interpretive Biography combines one of the oldest techniques in the social sciences and humanities with one of the newest Bringing in elements of postmodernism and interpretive social science it re-examines the biographical and autobiographical genres Hegel's Antiquity Will D. Desmond, 2020-07-30 Hegel's Antiquity aims to summarize contextualize and criticize Hegel's understanding and treatment of major aspects of the classical world approaching each of the major areas of his historical thinking in turn politics art religion philosophy and history itself The discussion excerpts relevant details from a range of Hegel's works with an eye both to the ancient sources with which he worked and the contemporary theories German aesthetic theory Romanticism Kantianism Idealism including Hegel's own and emerging historicism which coloured his readings What

emerges is that Hegel's interest in both Greek and Roman antiquity was profound and is essential for his philosophy arguably providing the most important components of his vision of world history. Hegel is generally understood as a thinker of modernity in various senses but his modernity can only be understood in essential relation to its predecessors and others notably the Greek world and Roman world whose essential spirit he assimilates to his own notion of Geist.
