**Three Wheel Lithium Battery  
Powered Trucks (Front Drive)**

**1.5-2t**

### **FOREWORD**

AC type three wheel lithium battery powered forklift truck with front drive is designed on the base of advantages of some trucks made by domestic and foreign manufacturers and developed an introduced technology from abroad to meet the market needs. These trucks are all suited for handling and stacking packed goods in stations, ports, goods yards, warehouses, food processing factory, light and textile industries and other factories. Because the AC type three wheel forklift truck with front drive has small turning radius so it is more suitable for narrow working space such as supermarket and enterprise with high requirements on load usage rate. With some of attachments fitted, the trucks can be applied more and more.

These trucks feature a wide-visible lifting system, integrated electric steering axle, torque feedback device, drive axle with automatic brake, continuous speed control, overhead guard with opened port, high quality motor, lithium battery, MOSFET electric controller and liquid crystal combined meter with large screen so they have a lot of advantages such as good performance, easy operation, wide visibility of operator, flexible steering, reliable loading, powerful and smooth power, low noise, no contamination to environment and beautiful control.

This manual states the trucks' specifications, operation, maintenance, service, main assemblies' constructions and working principles so as to help operators to use the trucks correctly and attain the highest functions. It is necessary to read over the manual before they operate the trucks or service personnel serve these trucks. The rules and notices in the manual should be abided seriously by relative personnel to enable trucks in optimized working state for long period and bring highest efficiency.

Because of the limit of space and editing, the figures, drawings, parts and such diagram illustration used in the manual do not have actual proportions. So size or mass can not be gained from diagram accurately.

This manual content might not correspond with the actual condition because of the improving of our products. Our products are subject to improvements and changes without notice.
