Good Things to Do Rüdiger Bittner,2023 R diger Bittner argues that the aim of thinking about what to do of practical reason is to find not what we ought to do but what it is good to do under the circumstances Neither under prudence nor under morality are there things we ought to do There is no warrant for the idea of our being required by natural law or by our rationality to do either what helps us attain our ends or what is right for moral reasons While common moral understanding is committed to there being things we ought to do and to our being guilty and deserving blame if we fail to do them we can lay aside these notions without loss indeed with benefit The volume also explains what it is for something to be good to do under the circumstances and argues for understanding practical reason in these terms What is good to do we find by experience what we go through teaches us what helps and what hinders and helps us figure out what is prudentially useful and what is morally right to do although ultimately this difference itself gives way and morality turns out to be a part of prudence

Doing Things for Reasons Rüdiger Bittner,2001 People do things for reasons but what are reasons and how are they related to the resulting actions Bittner explores this question and proposes an answer a reason is a response to that

state of affairs **How to Do Things with Emotions** Owen Flanagan,2023-04-04 The world today seems full of anger In the West particularly in the US and UK this anger can oftentimes feel aimless a possible product of social media Still anger is normally considered a useful motivational source for positive social change Channeling that anger into movements for civil rights alleviation of socio economic inequality and the end of endless wars has long been understood as a valuable tactic Moreover anger is believed to be handy in everyday life in order to protect and stick up for oneself On the flip side the world today celebrates diminishing amounts of shame Political leaders and pundits shamelessly abandon commitments to integrity truth and decency and in general shame is considered to be a primitive ugly emotion which causes eating disorders PTSD teenage pregnancy suicide and other highly undesirable circumstances Having shame is thus regularly understood as both psychologically bad and morally bad In *How to Do Things with Emotions* philosopher Owen Flanagan argues this thinking is backwards and that we need to tune down anger and tune up shame By examining cross cultural resources Flanagan demonstrates how certain kinds of anger are destructive while a mature sense of shame can be used as it is in many cultures as a socializing emotion that does not need to be attached to the self but can be called upon to protect good values kindness truth rather than bad ones racism sexism Drawing from Stoic Buddhist and other cultural traditions Flanagan explains that payback anger i e revenge and pain passing anger i e passing hurt one is feeling to someone else are incorrigible and also how the Western view of shame rooted in traditions of psychoanalysis is entirely unwarranted Continuing his method of doing ethics by bringing in cross cultural philosophy research from psychology and in this case widening that to include cultural psychology and anthropology Flanagan shows exactly how our culture shapes our emotions through norms and traditions and how proper cultivation of our emotions can yield important progress in our morality [How to Do Things with Corpora](#) Torsten Leuschner,Anaïs Vajnovszki,Gauthier Delaby,Jóhanna Barðdal,2025-05-05 Along with a renewed interest in the empirical foundations of linguistics the increasing accessibility of large scale corpora has sparked a surge of corpus linguistic work on the grammar of natural languages Corpus based methods enhance our knowledge and understanding of individual languages and they are theoretically significant because they allow us to test complex hypotheses on empirical and reproducible data Spread over six thematic sections the fifteen case studies in this book reflect on how methodological challenges and decisions affect the corpus based analysis of grammatical patterns They cover a wide variety of phenomena syntax registers learner language morphology productivity multilingualism under different frameworks including construction grammar discourse analysis and generative grammar The contributors discuss the respective methodological and theoretical issues proposing innovative solutions for linguistics in the 21st century *The Works of Aurelius Augustine: Letters. v. 1.
