Phonology in the Bilingual and Bidialectal Lexicon Isabelle Darcy, Annie Tremblay, Miquel Simonet, 2017-07-06 A conversation between two people can only take place if the words intended by each speaker are successfully recognized Spoken word recognition is at the heart of language comprehension This automatic and smooth process remains a challenge for models of spoken word recognition Both the process of mapping the speech signal onto stored representations for words and the format of the representation themselves are subject to debate So far existing research on the nature of spoken word representations has focused mainly on native speakers The picture becomes even more complex when looking at spoken word recognition in a second language Given that most of the world's speakers know and use more than one language it is crucial to reach a more precise understanding of how bilingual and multilingual individuals encode spoken words in the mental lexicon and why spoken word recognition is more difficult in a second language than in the native language Current models of native spoken word recognition operate under two assumptions i that listeners perception of the incoming speech signal is optimal and ii that listeners lexical representations are accurate As a result lexical representations are easily

activated and intended words are successfully recognized. However, these assumptions are compromised when applied to a later learned second language. For a variety of reasons e.g. phonetic, phonological, orthographic, second language users may not perceive the speech signal optimally and they may still be refining the motor routines needed for articulation. Accordingly, their lexical representations may differ from those of native speakers which may in turn inhibit their selection of the intended word forms. Second language users also have to solve a larger selection challenge having words in more than one language to choose from. Thus, for second language users, the links between perception, lexical representations, orthography and production are all but clear. Even for simultaneous bilinguals, important questions remain about the specificity and interdependence of their lexical representations and the factors influencing cross language word activation. This Frontiers Research Topic seeks to further our understanding of the factors that determine how multilinguals recognize and encode spoken words in the mental lexicon with a focus on the mapping between the input and lexical representations and on the quality of lexical representations.

Recent Research in Second Language Phonetics/Phonology Barbara O. Baptista, Andreia S. Rauber, Michael A. Watkins, 2009-10-02. Recent Research in Second Language Phonetics/Phonology: Perception and Production reports the findings of seventeen interphonology studies on perception/production of sounds by different first language speakers. All the papers describe careful empirical research and as such will be of great interest to anyone working or intending to work in the specific field of second language phonological acquisition. However, given that speech production and perception are highly complex skills, the research findings in this volume will also be relevant to those with a broader interest in language learning or cognition in general.

Lingüística del castellano chileno / Chilean Spanish Linguistics Brandon M. A. Rogers, Mauricio A. Figueroa Candia, 2021-09-07. Ya desde el siglo XIX el castellano chileno genera interés en lingüistas como Lenz (1891) quien lo aclamó como un geolecto dinámico y en constante evolución. Más recientemente un grupo importante de lingüistas contemporáneos ha indicado que existe una gran cantidad de diferencias entre el castellano de Chile y otras variedades en varios frentes lingüísticos tanto es así que debe considerarse como una zona dialectal independiente en el mundo hispanohablante. Su interés como caso práctico se ve reforzado por la incongruencia del grado particularmente alto de variación social y el menor grado de su variación geográfica. *Lingüística del castellano chileno: Estudios sobre variación, innovación, contacto e identidad* es el primer volumen de su tipo y reúne el trabajo de un grupo diverso e internacional de investigadores e investigadoras del castellano de Chile. Mediante el uso de múltiples teorizaciones y análisis lingüísticos actuales, este volumen examina cómo el uso, la variación, las actitudes, la identidad y el cambio lingüístico se manifiestan de manera nica en diferentes aspectos del castellano chileno y sus hablantes. Este volumen que acerca el trabajo más actual sobre la lingüística española de Chile a la vanguardia del campo constituye un recurso valioso para aquellos involucrados en la investigación y la enseñanza de la lingüística, la variación y el cambio lingüístico del castellano así como para estudiantes de grado y posgrado. As early as the 19th century, Chilean Spanish attracted the interest of linguists such as Lenz.

1891 who hailed it as an evolving and vibrant variety In more recent times a number of contemporary linguists have indicated that such a variety of differences exist between Chilean Spanish and other varieties on a number of linguistic fronts that it should be considered as an independent dialectal zone in the Spanish speaking world Its interest as a case study is reinforced further by the incongruence of the particularly high degree of social variation and the small degree of geographical variation Chilean Spanish Linguistics Studies on variation innovation contact and identity is the first of its kind bringing together the work of a diverse and international group of researchers on Chilean Spanish Through the use of current linguistic methods theorization and analyses this volume examines how language usage variation attitudes identity and change are uniquely manifested in different aspects of Chilean Spanish and its speakers Bringing the most current work on Chilean Spanish linguistics to the forefront of the field this volume will be a valuable resource to all involved in the research and teaching of Spanish language linguistics language variation and change as well as undergraduate and graduate students alike LA VARIATION COPULE/CLITIQUE SUJET EN ROMANI DU MEXIQUE AU CONTACT DE SER ET ESTAR DE L'ESPAGNOL CRISTIAN TUDOR PADURE,2020-01-01 Aceast teze vizeaz studiul alternan ei din varietatea romani mexicana a copulei si cu cliticile substantivale lo li la le Marantz Pianocorder Vorsetzer Reproducer Marantz (Firm),1978
