Appearance in Reality John Heil,2021-09-16 In *Appearance in Reality* John Heil addresses a question at the heart of metaphysics how are the appearances related to reality how does what we find in the sciences comport with what we encounter in everyday experience and in the laboratory Objects for instance appear to be colourful noisy self contained and massively interactive Physics tells us they are dynamic swarms of colourless particles or disturbances in fields or something equally strange Is what we experience illusory present only in our minds But then what are minds Do minds elude physics Or are the physicist s depictions mere constructs with no claim to reality Perhaps reality is

hierarchical physics encompasses the fundamental things the less than fundamental things are dependent on but distinct from these Heil s investigation advances a fourth possibility the scientific image what we have in physics affords our best guide to the nature of what the appearances are appearances of The Chautauquan ,1885 **Scrambling for Africa** Johanna Tayloe Crane,2013-09-15 Countries in sub Saharan Africa were once dismissed by Western experts as being too poor and chaotic to benefit from the antiretroviral drugs that transformed the AIDS epidemic in the United States and Europe Today however the region is courted by some of the most prestigious research universities in the world as they search for resource poor hospitals in which to base their international HIV research and global health programs In Scrambling for Africa Johanna Tayloe Crane reveals how in the space of merely a decade Africa went from being a continent largely excluded from advancements in HIV medicine to an area of central concern and knowledge production within the increasingly popular field of global health science Drawing on research conducted in the U S and Uganda during the mid 2000s Crane provides a fascinating ethnographic account of the transnational flow of knowledge politics and research money as well as blood samples viruses and drugs She takes readers to underfunded Ugandan HIV clinics as well as to laboratories and conference rooms in wealthy American cities like San Francisco and Seattle where American and Ugandan experts struggle to forge shared knowledge about the AIDS epidemic The resulting uncomfortable mix of preventable suffering humanitarian sentiment and scientific ambition shows how global health research partnerships may paradoxically benefit from the very inequalities they aspire to redress A work of outstanding interdisciplinary scholarship Scrambling for Africa will be of interest to audiences in anthropology science and technology studies African studies and the medical humanities
