

Conversions: 1 pound (£) = R14,58  
1 metre = 3,28 feet

\*Ferris wheel: a very large upright wheel with capsules on its circumference for people to ride in

Use the information above to answer the questions that follow.

4.1.1 Capsule 24 and capsule 30 have the following number of occupants.

|            | ADULTS<br>(16+) | CHILDREN<br>AGED 3-15 | SENIOR<br>CITIZENS |
|------------|-----------------|-----------------------|--------------------|
| Capsule 24 | 18              | 7                     | 2                  |
| Capsule 30 | 10              | 1                     | 5                  |

Only 5 adults of the total number of occupants in the table above bought tickets online. A South African tourist at the London Eye remarked that more than R18 400 was spent on these tickets. Verify, with calculations, whether this remark is CORRECT.

4.1.2 The capsules are mounted on the circumference of the wheel.

(a) Calculate (in feet) the circumference of the wheel.

You may use the formula:

$$\text{Circumference} = 2 \times \pi \times \text{radius, where } \pi = 3,142$$

(b) Hence, calculate the distance (in the nearest metre) on the circumference between any TWO capsules right next to each other.
