**Designing Effective Assessment** Trudy W. Banta, Elizabeth A. Jones, Karen E. Black, 2009-07-14 Fifteen years ago Trudy Banta and her colleagues surveyed the national landscape for the campus examples that were published in the classic work *Assessment in Practice*. Since then significant advances have occurred including the use of technology to organize and manage the assessment process and increased reliance on assessment findings to make key decisions aimed at enhancing student learning. Trudy Banta, Elizabeth Jones and Karen Black offer 49 detailed current examples of good practice in planning, implementing and sustaining assessment that are practical and ready to apply in new settings. This important resource can help educators put in place an effective process for determining what works and which improvements will have the most impact in improving curriculum, methods of instruction and student services on college and university campuses.

**Pandemic Diaries** Soumik Gangopadhyay, [The Pivotal Role of Academic Librarians in Digital Learning](#) Melissa N. Mallon, 2017-10-27 The budget constrained, rapidly evolving climate of higher education and academic libraries makes it a necessity for academic librarians and administrators to communicate the value of their library to the university. This book explains how to execute this critical task. Authored by a library director and director of library liaison and instructional services who formerly served as a faculty member, a librarian and a professional development instructor, *The Pivotal Role of Academic Librarians in Digital Learning* establishes the library's role in supporting student learning in an increasingly digital environment by exploring theoretical foundations and sharing concrete examples. The chapters focus on strategies and methods for demonstrating the academic library's value through strategic campus partnerships, creation of learning objects such as video tutorials, research instruction designed to facilitate student collaboration and participation in assessment of learning on campus. All of the topics addressed within a broad range of subject matter fall within the scope of learning in the digital age with particular emphasis on utilizing online learning environments including social media to teach students critical thinking and research skills as well as to position the academic library as an integral part of the modern learning environment. This book is a must read for academic librarians in instructional roles, teaching faculty, academic library administrators and managers who need to communicate the value of the library in relation to student learning and academic administrators who are obligated to demonstrate the important role of libraries in academic excellence. **Practical**

**Perceptions of Current Learning Management Systems**

Klaus Schütz, 2012-08-08 Scientific Study from the year 2011 in the subject Didactics Business economics Economic Pedagogy grade A Union Graduate College language English abstract iZoca.com is currently a hyper local social networking site It combines elements of social networks and organizational tools In contrast to other social networks like the market dominating Facebook iZoca is not based on relations between individuals but on group affiliations By giving their zip code members become part of their local community and can access the latest local news and information about events in their local area They can form and join groups in which activities can be planned managed and promoted to the public One of the most important features of iZoca is the integrated personal calendar However the company is struggling with difficulties Membership is growing very slowly Only about 4000 people are currently signed up at iZoca.com Revenues generated by ads on the website are scarce For these reasons we propose a strategy shift iZoca should enter the market of Learning Management Systems LMS by partnering with an existing LMS With its key features the group and community structure and the shared calendar it has the potential to satisfy needs of students and colleges that are currently either not or only insufficiently addressed by existing players in the market such as Blackboard or Moodle's Joule The entire college could be mirrored virtually in a community on iZoca Classes could be organized in groups over which students and teachers can interact and communicate about all issues related to the class Teachers could upload the syllabus or assignments students could hand in assignments by uploading Through the integrated calendar group members would always have an up to date overview of the class schedule or due dates for assignments Other things like campus events could also be organized in groups directly on the LMS platform Through a smartphone application students could also access the latest information

about classes and campus events directly over their smartphones These examples show that iZoca could clearly offer benefits to college students However before any actions are undertaken into this direction it is important to put any assumptions about customer needs on a fact based fundament To accomplish this a survey has been conducted with college students about their perceptions of their college s current LMS and about their appraisal of the features iZoca could offer The results of this survey are presented in this research paper
