McKenzie,D. Eric Schansberg,Dwight R. Lee,2024-03-28 A sophisticated yet non technical introduction to microeconomics for MBA students and undergraduates fully updated for its 4th edition Educational Innovation in Economics and Business Roger Ottewill,2003-12-31 Like previous volumes in the Educational Innovation in Economics and Business series this one is genuinely international in terms of its coverage It reflects the worldwide interest in and commitment to innovation in business education with a view to enhancing the learning experience of both undergraduates and postgraduates It should prove of value to anyone engaged directly in business education *Common Value Auctions and the Winner's Curse* John H. Kagel,Dan Levin,2021-04-13 An invaluable account of how auctions work and how to make them work Few forms of market exchange intrigue economists as do auctions whose theoretical and practical implications are enormous John Kagel and Dan Levin complementing their own distinguished research with papers written with other specialists provide a new focus on common value auctions and the winner s curse In such auctions the value of each item is about the same to all bidders but different bidders have different information about the underlying value Virtually all auctions have a common value element among the burgeoning modern day examples are those organized by Internet companies such as eBay Winners end up cursing when they realize that they won because their estimates were overly optimistic which led them to bid too much and lose money as a result The authors first unveil a fresh survey of experimental data on the winner s curse Melding theory with the econometric analysis of field data they assess the design of government auctions such as the spectrum rights air wave auctions that continue to be conducted around the world The remaining chapters gauge the impact on sellers revenue of the type of auction used and of inside information show how bidders learn to avoid the winner s curse and present comparisons of sophisticated bidders with college sophomores the usual guinea pigs used in laboratory experiments Appendixes refine theoretical arguments and in some cases present entirely new data This book is an invaluable impeccably up to date resource on how auctions work and how to make them work Competition Science Vision ,2004-09 Competition Science Vision
