

## Chapter 3.4 - Membrane Structure and Function

*How do substances move in and out of cells?*

### Why?

An advertisement for sports drinks, such as Gatorade, PowerAde, and Vitaminwater, etc. seem to be everywhere. All of these drinks are supposed to help your body recover and replenish lost electrolytes, fluids, and vitamins after exercise. But how do the essential molecules contained in these drinks get into your cells quickly to help you recover after exercise?

### Model 1 – Simple Diffusion

1. How many different types of molecules are shown in Model 1? **Two**
2. Count and record the number of triangles and circles found on each side of the membrane.  
**Triangles — 14 on left, none on right; Triangles — 14 on left, none on right**
3. Which shape is larger? **Triangle**
4. Describe the direction of the movement of the molecules in Model 1? **Triangle**
5. Which molecules are able to pass through the semi-permeable membrane? Justify your answer.  
**The dots, because they are small and can fit through the gaps, and because they are shown as equally distributed on both sides of the membrane**

The Text Book of Human Anatomy and Physiology I is a foundational resource tailored for students beginning their journey into the biological sciences and healthcare fields. It offers a comprehensive introduction to the structure and function of the human body starting with basic concepts such as the definitions and scopes of anatomy and physiology. The book delves into the levels of structural organization beginning with cells the building blocks of life and progresses through tissues organs and systems. Each chapter is methodically organized to build upon the previous one ensuring a logical progression of knowledge. The cellular level of organization explains cell structures functions transport mechanisms division and intracellular signaling pathways. In the tissue section the book details the classifications and functional significance of epithelial muscular nervous and connective tissues. The integumentary system chapter highlights the structure and vital protective functions of the skin. The skeletal and muscular systems are examined in detail with emphasis on bone classification joint articulation and muscle physiology including neuromuscular junctions. The book also includes essential insights into the body fluids and blood outlining components hematopoiesis coagulation and disorders. The lymphatic system section presents the roles of lymph lymph nodes and organs in immunity. Further the peripheral nervous system is thoroughly explored covering cranial and spinal nerves and the sympathetic and parasympathetic divisions. Special senses are introduced with detailed coverage of the eye ear nose and tongue along with associated disorders.
