Future Prospects,2017-01-28 Genetically engineered GE crops were first introduced commercially in the 1990s After two decades of production some groups and individuals remain critical of the technology based on their concerns about possible adverse effects on human health the environment and ethical considerations At the same time others are concerned that the technology is not reaching its potential to improve human health and the environment because of stringent regulations and reduced public funding to develop products offering more benefits to society While the debate about these and other questions related to the genetic engineering techniques of the first 20 years goes on emerging genetic engineering technologies are adding new complexities to the conversation Genetically Engineered Crops builds on previous related Academies reports published between 1987 and 2010 by undertaking a retrospective examination of the purported positive and adverse effects of GE crops and to anticipate what emerging genetic engineering technologies hold for the future This report indicates where there are uncertainties about the economic agronomic health safety or other impacts of GE crops and food and makes recommendations to fill gaps in safety assessments increase regulatory clarity and improve innovations in and access to GE technology

Hard Bargains Mona Lynch,2016-11-01 The convergence of tough on crime politics stiffer sentencing laws and jurisdictional expansion in the 1970s and 1980s increased the powers of federal prosecutors in unprecedented ways In Hard Bargains social psychologist Mona Lynch investigates the increased power of these prosecutors in our age of mass incarceration Lynch documents how prosecutors use punitive federal drug laws to coerce guilty pleas and obtain long prison sentences for defendants particularly those who are African American and exposes deep injustices in the federal courts As a result of the War on Drugs the number of drug cases prosecuted each year in federal courts has increased fivefold since 1980 Lynch goes behind the scenes in three federal court districts and finds that federal prosecutors have considerable discretion in adjudicating these cases Federal drug laws are wielded differently in each district but with such force to overwhelm defendants ability to assert their rights For drug defendants with prior convictions the stakes are even higher since prosecutors can file charges that incur lengthy prison sentences including life in prison without parole Through extensive field research Lynch finds that prosecutors frequently use the threat of extremely severe sentences to compel defendants to plead guilty rather than go to trial and risk much harsher punishment Lynch also shows that the highly discretionary ways in which federal prosecutors work with law enforcement have led to significant racial disparities in federal courts For instance most federal charges for crack cocaine offenses are brought against African Americans even though whites are more likely to use crack In addition Latinos are increasingly entering the federal system as a result of aggressive immigration crackdowns that also target illicit drugs Hard Bargains provides an incisive and revealing look at how legal reforms over the last five decades have shifted excessive authority to federal prosecutors resulting in the erosion of defendants rights and extreme sentences for those convicted Lynch proposes a broad overhaul of the federal criminal justice system to restore the balance of power and retreat from the punitive indulgences of the War on Drugs
