Chasing Revenue Gregory Cross, 2021-08-04 Revenue management is like any other management practice It involves making pricing and inventory decisions based on assembled data coming from a variety of sources The name revenue management was coined by Robert G Cross the founder of Aeronomics Talus and Revenue Analytics no relation to the author Ravi Mehrotra a young computer engineer who wanted to start his own company was another believer in revenue management He'd go on to create the largest revenue management software company in the world Both Robert Cross and Ravi Mehrotra built revenue management systems It would be left to Gregory Cross and a few others to take the concepts of revenue management which were originally focused on the airline industry and use them to revolutionize the hotel industry Along the way he would discover it was more than just technology and algorithms What they were building in the 1990's was a new way of looking at the business In this book Cross documents the difficulty to reimagine hotel pricing and decision making in the last decade of the twentieth century It was a time when the Internet was young and unruly and no one had ever heard of big data The book

also serves as a crash course of what it takes to succeed in the hospitality industry and how to get your ideas heard as you rise up the ranks **The Army Lawyer** ,
