Symons's Monthly Meteorological Magazine ,1874 **Politics of the Past** David Cowan,2024-04-11 The inter war period 1918 1939 is still remembered as a period of mass deprivation the hungry thirties But how did this impression emerge Thousands of conversations about life in the inter war period between parents and children around the dinner table among workmates at the pub shaped these understandings In turn these fed into popular politics Stories about the embryonic welfare system in the early twentieth century informed how people felt towards the National Health Service memories of the Great Depression shaped arguments about state intervention in the economy Challenging accounts of widespread political disengagement in the twentieth century **Politics of the Past** shows how re telling family stories about the inter war period offered ordinary people an accessible way of engaging in politics Drawing on six local case studies across Scotland and England this book explains how stories about the inter war working class experience in industrial areas came to appear commonplace nationwide **The Musical Times** ,1925 **The Musical Times & Singing-class Circular** ,1925 *Urban Transformations* Nicholas Wise,Julie Clark,2017-06-14 Economic restructuring and demographic change have in recent years placed much strain on urban areas with the effects falling disproportionately on neighbourhoods that were previously underpinned by industry and manufacturing This has presented policy makers and city planners with a binary choice to resist change and stagnate or to change and attempt to keep up with the pace of global demand This edited book tells the story of how urban transformation impacts on people's lives and everyday interactions to question where and to whom benefit accrues from

these changes Urban Transformations offers insight into both risk and reward as local communities and public authorities creatively address the challenge of building vital and sustainable urban environments The authors in this edited collection argue that understanding the specifics of community space and place is crucial to delivering insights into how where when why and for whom urban areas might successfully transform The chapters investigate urban change using a range of approaches and case studies from the four corners of the Earth from the United States to Iran from the United Kingdom to Canada The varying scales at which governance or regeneration initiatives operate the nature and composition of urban communities and the local or global interests of different private sector actors all raise questions for urban policy and practice It is important to not only consider the drivers of regeneration but its beneficiaries need to be identified This edited volume addresses and elaborates on critical issues facing urban transformation and renewal as a basis for future discussion on strategies for successful urban transformation
