Grlife Science Memo November 2014:

A Minor Revolution Adam Benforado, 2023-02-07 A revelatory investigation into how America is failing its children and an urgent manifesto on why helping them is the best way to improve all of our lives from the New York Times bestselling author of *Unfair The New Science of Criminal Injustice* Compelling an extremely sympathetic and worthy attempt to protect kids Benforado has written a book that reads like a manifesto His ideas are bold to the point and ambitious *The Atlantic* At the dawn of the twentieth century a bright new age for children appeared on the horizon with progress on ending child labor providing public education combating indigence promoting wellness and creating a juvenile justice system But a hundred years on the promised light has not arrived Today more than eleven million American children live in poverty and more than four million lack health insurance Each year we prosecute thousands of kids as adults while our schools crumble We deny young people any political power while we fail to act on the issues that matter most to them racism inequality and climate change Through unforgettable stories law professor Adam Benforado draws a vivid portrait of our neglect We are there when Ariel is placed in an orphanage after her parents are locked away for transporting marijuana when Harold first gazes in disbelief upon the immaculate lawn of an elite private school after a childhood of asphalt play yards when Wylie is hit with a paddle by his public school principal as punishment for taking a moment of silence to protest gun violence When Tyler runs for governor at age seventeen we are also there to witness the extraordinary capacities of young people Our disregard for children's rights is not simply a moral problem it's also an economic and social one The root cause of nearly every major challenge we face from crime to poor health to unemployment can be found in our mistreatment of kids But in that sobering truth is also the key to changing our fate as a nation Drawing on the latest research on the value of early intervention investment and empowerment *A Minor Revolution* makes the urgent case for putting children first in our budgets and policies in how we develop products and enact laws and in our families and communities Childhood is the window of opportunity for all of us

21 Lessons for the 21st Century Yuval Noah Harari, 2018-09-04 1 NEW YORK TIMES

BESTSELLER In *Sapiens* he explored our past In *Homo Deus* he looked to our future Now one of the world's most innovative thinkers explores what it means to be human in an age of bewilderment now updated with new material Fascinating a crucial global conversation about how to take on the problems of the twenty first century Bill Gates *The New York Times* Book Review *A FINANCIAL TIMES* BEST BOOK OF THE YEAR How can we protect ourselves from nuclear war or ecological catastrophe What do we do about the epidemic of fake news or the threat of terrorism How should we prepare our children for the future *21 Lessons for the 21st Century* is a probing and visionary investigation into today's most urgent issues as we move into the future As technology advances faster than our understanding of it hacking becomes a tactic of war and the world feels more polarized than ever Harari addresses the challenge of navigating life in the face of constant and disorienting change and raises the important questions we need to ask ourselves in order to survive In twenty one accessible chapters

that are both provocative and profound Harari untangles political technological social and existential issues and offers advice on how to prepare for a very different future from the world we now live in How can we retain freedom of choice when Big Data is watching us What will the future workforce look like and how should we ready ourselves for it Why is liberal democracy in crisis Harari s unique ability to make sense of where we have come from and where we are going has captured the imaginations of millions of readers Here he invites us to consider values meaning and personal engagement in a world full of noise and uncertainty When we are deluged with irrelevant information clarity is power Presenting complex contemporary challenges clearly and accessibly 21 Lessons for the 21st Century is essential reading Governomics Ian McAuley, Miriam Lyons, 2015-05-01 People have good reason to demand decent public education and a well funded health system to yearn for an economy that doesn t trash the environment or for a smaller gap between rich and poor Almost without exception sound economics is on their side We ve grown used to public debates that pit people and the planet against an abstract distorted image of the economy but it doesn t have to be this way Governomics shows that an emaciated state is bad for business and that standing up for government means standing up for a public sector that truly serves the public Everybody knows governments are wasteful incompetent and a drag on the economy But if you re not sure that s true read this book Ross Gittins Sydney Morning Herald and The Age Governomics shows that a market economy can only work when sustained by a strong and active public sector It will inject some much needed economic sanity into conversations on the role of government in Australia John Quiggin Australian Research Council Laureate Fellow University of Queensland **Global Social Policy** Kepa Artaraz, Liz Cunningham, Michael Hill, 2016-06-29 Social policy is a subject that helps develop our understanding of the meaning of human wellbeing and of the systems by which wellbeing must be promoted As a discipline social policy has traditionally been blunted by a focus on the nation state however in this age of globalisation the most pressing challenges such as climate change ageing populations and flagging economies serve as proof that even at national level social policy is now more heavily influenced by global factors than ever before In this important and authoritative text Kepa Artaraz and Michael Hill provide a richly detailed contribution to our understanding of the global forces shaping social problems today Part One discusses the different approaches to social policy and explores the process of globalisation looking particularly at its winners and losers and the implications it has for human well being Part Two examines more closely the key actors in global social policy such as the market the state and international organisations and Part Three provides an opportunity to explore some specific key issues of global importance such as employment and migration demographic change and global poverty Adding considerable momentum to the movement away from a reductionist nationally focused study of the discipline Global Social Policy opens up new and stimulating discussions and provides a fresh framework for the study of human well being Using policy examples from areas around the world to provide a truly international scope it is an essential read for students studying at all levels Global Transformations in the Life Sciences, 1945-1980 Patrick Manning, Mat

Savelli,2018-06-07 The second half of the twentieth century brought extraordinary transformations in knowledge and practice of the life sciences In an era of decolonization mass social welfare policies and the formation of new international institutions such as UNESCO and the WHO monumental advances were made in both theoretical and practical applications of the life sciences including the discovery of life s molecular processes and substantive improvements in global public health and medicine Combining perspectives from the history of science and world history this volume examines the impact of major world historical processes of the postwar period on the evolution of the life sciences Contributors consider the long term evolution of scientific practice research and innovation across a range of fields and subfields in the life sciences and in the context of Cold War anxieties and ambitions Together they examine how the formation of international organizations and global research programs allowed for transnational exchange and cooperation but in a period rife with competition and nationalist interests which influenced dramatic changes in the field as the postcolonial world order unfolded **Science in**

the Archives Lorraine Daston,2017-04-04 Archives bring to mind rooms filled with old papers and dusty artifacts But for scientists the detritus of the past can be a treasure trove of material vital to present and future research fossils collected by geologists data banks assembled by geneticists weather diaries trawled by climate scientists libraries visited by historians These are the vital collections assembled and maintained over decades centuries and even millennia which define the sciences of the archives With *Science in the Archives* Lorraine Daston and her co authors offer the first study of the important role that these archives play in the natural and human sciences Reaching across disciplines and centuries contributors cover episodes in the history of astronomy geology genetics philology climatology medicine and more as well as fundamental practices such as collecting retrieval and data mining Chapters cover topics ranging from doxology in Greco Roman Antiquity to NSA surveillance techniques of the twenty first century Thoroughly exploring the practices politics economics and potential of the sciences of the archives this volume reveals the essential historical dimension of the sciences while also adding a much needed long term perspective to contemporary debates over the uses of Big Data in science

Dying of Whiteness Jonathan M. Metzl,2019-03-05 A physician s provocative Boston Globe and timely Ibram X Kendi New York Times Book Review account of how right wing backlash policies have deadly consequences even for the white voters they promise to help In election after election conservative white Americans have embraced politicians who pledge to make their lives great again But as physician Jonathan M Metzl shows in *Dying of Whiteness* the policies that result actually place white Americans at ever greater risk of sickness and death Interviewing a range of everyday Americans Metzl examines how racial resentment has fueled progun laws in Missouri resistance to the Affordable Care Act in Tennessee and cuts to schools and social services in Kansas He shows these policies costs increasing deaths by gun suicide falling life expectancies and rising dropout rates Now updated with a new afterword *Dying of Whiteness* demonstrates how much white America would benefit by emphasizing cooperation rather than chasing false promises of supremacy Winner of the Robert F Kennedy Book

Award **Arab Dawn** Bessma Momani, 2015-11-26 In the West news about the Middle East is dominated by an endless stream of reports and commentary about civil war sectarian violence religious extremism and economic stagnation But do they tell the full story For instance who knew that university enrolment in the war torn Palestinian territories exceeds that of Hong Kong or that more than a third of Lebanese entrepreneurs are women Change is on its way in the Middle East argues Bessma Momani and its cause is demographic Today one in five Arabs is between the ages of fifteen and twenty four Young optimistic and increasingly cosmopolitan their generation will shape the region's future Drawing on interviews surveys and other research conducted with young people in fifteen countries across the Arab world Momani describes the passion for entrepreneurship reform and equality among Arab youth With insightful political analysis based on the latest statistics and first hand accounts *Arab Dawn* is an invigorating study of the Arab world and the transformative power of youth *Object Lessons and the Formation of Knowledge* Kerstin Barndt, Carla M. Sinopoli, 2017-09-19 *Object Lessons and the Formation of Knowledge* explores the museums libraries and special collections of the University of Michigan on its bicentennial Since its inception U M has collected and preserved objects biological and geological specimens ethnographic and archaeological artifacts photographs and artistic works encyclopedia textbooks rare books and documents and many other items These vast collections and libraries testify to an ambitious vision of the research university as a place where knowledge is accumulated shared and disseminated through teaching exhibition and publication Today two hundred years after the university's founding museums libraries and archives continue to be an important part of U M which maintains more than twenty distinct museums libraries and collections Viewed from a historic perspective they provide a window through which we can explore the transformation of the academy its public role and the development of scholarly disciplines over the last two centuries Even as they speak to important facets of Michigan's history many of these collections also remain essential to academic research knowledge production and object based pedagogy Moreover the university's exhibitions and displays attract hundreds of thousands of visitors per year from the campus regional and global communities Beautifully illustrated with color photographs of these world renowned collections this book will appeal to readers interested in the history of museums and collections the formation of academic disciplines and of course the University of Michigan *The Ideas Industry* Daniel W. Drezner, 2017-03-01 The public intellectual has a long and storied history Previously the public intellectual was always expected to opine on a broad array of topics from foreign policy to economics Yet in recent years a new kind of thinker has supplanted that archetype the thought leader Equipped with one big idea thought leaders focus their energies on TED talks rather than highbrow periodicals In contrast to public intellectuals thought leaders gain fame as single idea merchants Their ideas are often laudable and highly ambitious but they often work through institutions that are closed to the public and less open to criticism In *The Ideas Industry* Daniel W Drezner explains how this shift happened pointing to the roles of political polarization heightened inequality and eroding trust in authority In contrast to their predecessors today's intellectuals are

more likely to enjoy the support of ideologically friendly private funders and be housed in ideologically driven think tanks Increasing inequality is also a key driver of this shift more than ever before contemporary plutocrats fund intellectuals and idea factories that generate arguments that align with their own Finally the erosion of trust in experts has lowered the barriers of entry in the marketplace of ideas But while there are certainly some downsides to the contemporary ideas industry Drezner argues that it is very good at broadcasting ideas widely and reaching large audiences hungry for new thinking Both fair minded and trenchant The Ideas Industry reshapes our understanding of contemporary public intellectual life in America and the West

Risk Regulation in the Internal Market Maria Weimer, 2019-03-13 This book offers a topical inquiry into the legal and political limits of EU regulation in the field of risk and new technologies surrounded by technological scientific complexity uncertainty and societal contestation It uses agricultural biotechnology as a paradigmatic example to illustrate the complex intertwinement between environmental public health economic and social concerns in risk regulation Weimer analyses the drawbacks of the EU approach to agricultural biotechnology showing that its reductionism i e the narrow understanding of GMO risks as well as the exclusion of broader societal concerns related to environmental and social sustainability has undermined both the legitimacy and effectiveness of EU regulation in this area Resistance to this approach however has also triggered legal innovations prompting us to re think EU internal market law including the way in which it manages the tensions between unity and diversity and between social and economic concerns This text offers fresh and original insights into how far the EU can go in harmonizing regulatory approaches to risk At the same time it proposes new ways of re thinking EU risk regulation to make it more responsive to different perspectives on risk and technology A unique feature of this book is that it contributes to various strains of scholarship including risk regulation internal market law public administration and studies of governance and regulation as well as connecting these themes to broader debates about the legitimacy of European integration and new ways of differentiated integration As a result it assists in re imagining the EU internal market and its regulation as a site of diversity

Finks Joel Whitney, 2017-01-03 When news broke that the CIA had colluded with literary magazines to produce cultural propaganda throughout the Cold War a debate began that has never been resolved The story continues to unfold with the reputations of some of America's best loved literary figures including Peter Matthiessen George Plimpton and Richard Wright tarnished as their work for the intelligence agency has come to light Finks is a tale of two CIAs and how they blurred the line between propaganda and literature One CIA created literary magazines that promoted American and European writers and cultural freedom while the other toppled governments using assassination and censorship as political tools Defenders of the cultural CIA argue that it should have been lauded for boosting interest in the arts and freedom of thought but the two CIAs had the same undercover goals and

shared many of the same methods deception subterfuge and intimidation Finks demonstrates how the good versus bad CIA is a false divide and that the cultural Cold Warriors again and again used anti Communism as a lever to spy relentlessly on leftists and indeed writers of all political inclinations and thereby pushed U S democracy a little closer to the Soviet model of the surveillance state

All We Want Michael Harris,2025-04-01 Our lives are defined by a story of endless growth and consumption Now a climate crisis demands that we change Can we write new stories In All We Want award winning author Michael Harris dismantles our untenable consumer culture and delivers surprising heartwarming alternatives Drawing on the wisdom of philosophers scientists and artists Harris uncovers three realms where humans have always found deeper meaning the worlds of Craft the Sublime and Care Past attempts to blunt our impact on the environment have simply redirected our consumption we bought fuel efficient cars and canvas tote bags We cannot however buy our way out of this crisis We need instead compelling new stories about life s purpose Part meditation and part manifesto All We Want is a blazing inquest into the destructive and unfulfilling promise of our consumer society and a roadmap toward a more humane future

Developing to Scale Heidi Morefield,2023-10-24 The first critical book on appropriate technology Developing to Scale shows how global health came to be understood as a problem to be solved with the right technical interventions In 1973 economist E F Schumacher published Small Is Beautiful which introduced a mainstream audience to his theory of appropriate technology the belief that international development projects in the Global South were most sustainable when they were small scale decentralized and balanced between the traditional and the modern His theory gained widespread appeal as cuts to the foreign aid budget the national interests of nations seeking greater independence postcolonial activism and the rise of the United States tech sector drove stakeholders across public and private institutions toward cheaper tools In the ensuing decades US foreign assistance shifted away from massive modernization projects such as water treatment facilities toward point of use technologies like village water pumps and oral rehydration salts This transition toward the small scale had massive implications for the practice of global health Developing to Scale tells the history of appropriate technology in international health and development relating the people organizations and events that shaped this consequential idea Heidi Morefield examines how certain technologies have been defined as more or less appropriate for the Global South based on assumptions about gender race culture and environment Her study shows appropriate technology to be malleable as different constituencies interpreted its ideas according to their own needs She reveals how policymakers wielded this tool to both constrain aid to a scale that did not threaten Western interests and to scale the practice of global health through the development and distribution of technical interventions
