Guide To Vedic Maths:

Vedic Mathematics for All Ages Vandana Singhal, 2007 The author has attempted to codify several useful results embedded in the ancient lore in a form which is easily accessible to the children learning mathematics Many of the chapters deal with computations using simple techniques which will shorten the effort involved in the conventional approach The price one pays of course is that one has to learn the tricks memorize them and use the appropriate one for each problem While one might think that this takes away the generality of the modern approach it certainly has the element of charm and intrigue which children and grown ups will find entertaining Even working out why many of these approaches lead to correct results is a valuable exercise by itself Contents Foreword Preface Feedback Introduction 1 Complement Subtraction Multiplication by Specific Numbers Base Multiplication Working Base Multiplication Multiplication Algebra Digital Roots Divisibility Division I Division II Squares Straight Squaring Cubes Square roots of exact squares Cube roots of exact cubes Straight Division Square roots II Sutras Glossary Index

Vedic Maths for 8th Class (Second Edition) Gaurish Borkar, 2017-10-13 Mathematics is a tricky subject Those who love enjoy it much and those who don t feel it s boring I lost interest in mathematics while in 7th class Based on whatever I remember it was mainly due to a lack of understanding of negative numbers By nature I am a kinaesthetic person and therefore I refuse to accept anything unless understood thoroughly Generally just memorization doesn t work for me and the same thing happened about the multiplication of negative numbers Our teacher presented them as rules and I refused to accept them at face value One year later my cousin s grandfather started living with us and he had a great interest in teaching Moreover his concepts in mathematics were extremely clear and he could answer all my crazy questions This retriggered my interest in mathematics The whole journey was so joyful that I wish everyone get a grandfather like him who is at home to help with fundamental questions in studies When I started thinking about developing books as per the curriculum the next question was which board to follow After a bit
