Guided Democracy In Indonesia:

The Transition to Guided Democracy Daniel S. Lev, 2009 Periods of major political transition are generally so complex as to present the political analyst with one of his most difficult challenges Indonesia between 1957 and 1959 was no exception During these years a previously wide diffusion of political power was superseded by its increasing concentration in three major bases President Soekarno the Army and the Communist Party This was also a period of crisis in the relationships of Djakarta and Java with the other major islands of the archipelago and it was marked by ideological ferment and change largely dominated by the views of President Soekarno It was during these years that Guided Democracy was given its initial shape with the stage being set for a power struggle which was to become increasingly intense So dramatic were the political experiences of this period and so deeply etched in the minds of many Indonesians that their effect is still strongly felt and can be expected to influence the character of Indonesia's political development for many years to come Dr Daniel S Lev is particularly well qualified to examine the course of Indonesian political developments between 1957 and 1959 Arriving in Indonesia towards the end of this period he remained there for three years engaged in an intensive study of its political life His monograph constitutes by far the most searching analysis yet to appear of this critically important period As well as providing a guide to these earlier formative years in the nation's political development it will I am sure long remain relevant for all those seriously interested in understanding contemporary Indonesian political life George McT Kahin August 10 1966

The Floracrats Andrew Goss,2011-02-01

Situated along the line that divides the rich ecologies of Asia and Australia the Indonesian archipelago is a hotbed for scientific exploration and scientists from around the world have made key discoveries there But why do the names of Indonesia s own scientists rarely appear in the annals of scientific history In *The Floracrats* Andrew Goss examines the professional lives of Indonesian naturalists and biologists to show what happens to science when a powerful state becomes its greatest and indeed only patron With only one purse to pay for research Indonesia s scientists followed a state agenda focused mainly on exploiting the country s most valuable natural resources above all its major export crops quinine sugar coffee tea rubber and indigo The result was a class of botanic bureaucrats that Goss dubs the floracrats Drawing on archives and oral histories he shows how these scientists strove for the Enlightenment ideal of objective universal and useful knowledge even as they betrayed that ideal by failing to share scientific knowledge with the general public With each chapter Goss details the phases of power and the personalities in Indonesia that have struggled with this dilemma from the early colonial era through independence to the modern Indonesian state Goss shows just how limiting dependence on an all powerful state can be for a scientific community no matter how idealistic its individual scientists may be

Islam and the Secular State in Indonesia Luthfi Assyauckanie,2009 This is an excellent book which will have a major impact on the current debate about the relationship between Islam and politics in Indonesia Its greatest strength is its innovative characterization of three Indonesian Muslim models of polity as opposed to the normal two Islamic state and secular state Assyauckanie brilliantly delineates a third model which he calls the Religious Democratic State in the process greatly clarifying our understanding of the previous models which he now proposes to label the Islamic Democratic State and the Liberal Democratic State Another strength of the book is methodological Each of its arguments is solidly grounded in the thoughts and actions of particular players Indonesian Muslim thinkers and activists
