

**PsychSim 5: HEMISPHERIC SPECIALIZATION**

Name: \_\_\_\_\_

Section: \_\_\_\_\_

Date: \_\_\_\_\_

This activity describes what researchers have learned about the special abilities of the left and right sides of the brain. You will learn how information is transmitted to these two hemispheres and about the unique function of each.

**Hemispheric Connections**

- What is the name of the band of fibers connecting the left and right hemispheres of the brain? What is its function?
  
- Each hemisphere is primarily connected to the opposite side of the body. This means that a touch on the *left* hand would be registered in which hemisphere?
  
- When sound waves enter the *right* ear, which hemisphere receives the primary information?
  
- This crossover pattern is also true in part for the visual pathway. When light enters the *left* eye, which hemisphere receives the information?
  
- How is the visual pathway from the eye *different* from that of the ear or hand?

**Split-Brain Research**

- Briefly explain split-brain research.
  
- If a participant is blindfolded and a fork is placed in his or her *right* hand, how would you guess that the person would respond?
  
- If a participant is blindfolded and a fork is placed in his or her *left* hand, how would you guess that the person would respond?
