Ross,2009-02-15 Are the machines in your office living isolated lives Do you have a few computers at home that you want to connect to each other and the Internet The best way to share files on a group of computers is to create a network But how do you do that Network Know How is your guide to connecting your machines filled with practical advice that will show you how to get things done You ll learn the nitty gritty of network setup design and maintenance from running cables and placing wireless access points to configuring file sharing and printing This practical and comprehensive guide will teach you how to implement security create intranets and more You ll learn how to Connect Windows Macintosh and Linux computers Implement network addressing Configure your network adapters hubs switches and router Share music photos and documents Automate household appliances and stream digital audio and video to your home entertainment center Troubleshoot network slowdowns and failures No matter which operating system you use and even if you ve never installed or run a network before you ll get what you need to know in Network Know How How Linux Works Brian

Ward,2004-05-01 Whether you re a systems administrator or a home user you need to understand how Linux internals work before you can really master Linux how it boots how networking works how to customize the kernel and even what hardware to buy How Linux Works contains the kind of information normally handed down from wizards knowledge that comes from years of experience doing things the hard way But instead of seeking the right incantation to make your system work you can read How Linux Works to see how to administer Linux and why each particular technique works This book covers such need to know topics as How Linux boots with coverage of boot loaders and init How networking interfaces firewalls and servers work How development tools and shared libraries work How the kernel manages devices device drivers and processes and how to build a custom kernel How the Linux printing system works with sections on cups filters and Ghostscript How shell scripts work With its combination of background theory and real world examples How Linux Works will show you how to run your system instead of having your system run you **IP Address Management** Timothy Rooney,2011-04-20 This book will

be the first covering the subject of IP address management IPAM The practice of IPAM includes the application of network management disciplines to IP address space and associated network services namely DHCP Dynamic Host Configuration Protocol and DNS Domain Name System The consequence of inaccurately configuring DHCP is that end users may not be able to obtain IP addresses to access the network Without proper DNS configuration usability of the network will greatly suffer as the name to address lookup process may fail Imagine having to navigate to a website or send an email or an instant message by IP address instead of by name It s equally important that these DHCP and DNS configurations be based on a common IP address plan which maps out the IP address hierarchy subnets address pools and domains IPAM applies management disciplines to these core services including configuration change control auditing reporting and so on and they are necessary given the absolute requirement for properly managing IP space and DHCP and DNS servers The linkages among an IP address plan DHCP server configuration and DNS server configuration are inseparable a change of an IP

address will affect DNS information and perhaps DHCP as well. These functions provide the foundation for today's converged services IP networks so they need to be managed using a rigorous approach. Today there is no single book that covers the management of these linkages and services they provide. IP Address Management: Principles and Practice will fill that gap. While several books are available for leading vendors' DHCP and DNS services implementations, few exist for IP address planning, and none exist that unifies these three topics. To obtain a free copy of the IPAM Configuration Guide, please send an email to ieeeproposals@wiley.com.
