1998 Report of the Refrigeration, Air Conditioning, and Heat Pumps Technical Options Committee United Nations Environment Programme. Refrigeration, Air Conditioning, and Heat Pumps Technical Options Committee, 1998

Refrigeration, Air Conditioning and Heat Pumps Technical Options Committee 2002 United Nations Environment Programme, 2003-09 The 2002 assessment report produced under the Montreal Protocol on ozone depleting substances finds that technical progress has been made by the refrigeration air conditioning and heat pump industry to comply with requirements to phase out CFCs and in several applications HCFCs as well However there is still a significant amount of installed refrigeration equipment still using CFCs and HCFCs and so service demand remains high and is best minimised by preventive service containment retrofit recovery and recycling
