

De-Scaling Your Brewer

Mineral content in water varies from place to place. Depending on the mineral content of the water in your area, calcium deposits or scale may build up in your Brewer. Scale is non-toxic, but left unattended, it can hinder Brewer performance. De-scaling your Brewer helps maintain the heating element, and other internal parts of the Brewer that come in contact with water.

The Brewer should be de-scaled every 3-6 months to ensure optimal performance. It is possible for calcium deposits to build up faster, making it necessary to de-scale more often.

This Brewer is equipped with sensors to detect when scale buildup is interfering with the performance of the Brewer. When this is detected, 'DE-SCALE' will be displayed on the LCD Control Center.

You should promptly de-scale if 'DE-SCALE' is displayed on the LCD Control Center. Properly follow the de-scaling procedure described.

NOTE: The Brewer will continue to function even when 'DE-SCALE' is displayed. However, if you do not de-scale soon after it is displayed, continued scale build-up could damage the Brewer. If this occurs, 'DE-SCALE' will begin to flash to alert you to the potential damage to the Brewer if you do not de-scale immediately.

De-Scaling Instructions

a. PREPARE

Step 1: Make sure you have at least 60 oz. of undiluted white vinegar on hand. You will also need an empty sink and a ceramic cup (do not use a paper cup.)

Step 2: Empty the Water Reservoir.

b. FILL and CLEAN

Step 1: Pour the vinegar into the Water Reservoir and fill it to the line just below the top edge of the clear viewing area.

Step 2: Place a 12 oz. or larger ceramic cup in the Drip Tray and run a brew cycle.

DO NOT USE A K-CUP® portion pack.

Select the Travel Mug (large) size and press 'BREW'. Pour the contents of the cup into the sink.

Step 3: Repeat the brew process until the Water Reservoir is empty, pouring the contents of the cup into the sink after each cycle. Remember to open and close the lid between each cycle so the Button lights will flash.

Step 4: Now let the Brewer stand for at least 4 hours while still on.

Step 5: Rinse the Water Reservoir thoroughly and fill with fresh water.

c. RINSE

Step 1: Ensure the Water Reservoir is filled with fresh water.

Step 2: Place a ceramic cup on the Drip Tray and run a travel mug brew cycle. Pour the contents of the cup into the sink.

Step 3: Repeat brew process until the Water Reservoir is empty.

Step 4: You may need to perform additional rinse cycles if you notice any residual taste.

NOTE: If 'DE-SCALE' is still displayed on the LCD Control Center after completing the procedure, repeat the de-scaling procedure above.
