unfamiliar in the familiar to step back and see organization and predictability in their take for granted personal experiences Newman uses the metaphors of architecture and construction to help students understand that society is not something that exists out there independently of themselves it is a human creation that is planned maintained or altered by individuals Instead of surveying every subfield in sociology this text focuses on the structural features of society the social construction of self and identity and social inequality in the context of social institutions The new edition includes examples and analysis of contemporary events and trends including The changes in our national politics brought about by the 2016 presidential election Increasing societal attention paid to fatal encounters between police and unarmed people of color or incidents of sexual harassment and assault School shootings and the debates over gun ownership The continued dramatic growth of communication technology particularly social networking sites

Drowning by Accident Elizabeth Meinhard, 2022-02-15 Drowning By Accident explains why it is so easy to drown where accidents happen and how to save lives by early rescue and resuscitation More than 600 people die by drowning in Britain every year Swimming is promoted as a particularly safe form of exercise so that swimmers forget or ignore the dangers of frigid lakes swollen rivers incoming tides or outgoing rip currents Drowning accidents take place because we don't recognise water as a hostile environment We overestimate the strength and endurance of our bodies and underestimate the power and deceptiveness of water Year after year victims lose their lives in typical drowning accidents often sinking so quickly and silently that nearby family friends and onlookers fail to notice the tragedy taking place close beside them Babies drown in baths Toddlers drown in garden ponds School children fall off rafts Teenagers strike too far from the shore Pensioners wade into rivers to save their dogs Victims often die within minutes of sinking beneath the surface A quarter of those who reach hospital alive will also die while others survive with severe permanent brain damage This means that it is vitally important for parents grandparents teachers lifeguards and lawmakers to recognise the risks and prevent drowning accidents before they take place

The Reckoning Thomas Beckett Kane, 2025-10-02 When a respiratory virus with a 0.2% fatality rate brought the world's most powerful democracy to its knees something had gone terribly wrong In The Reckoning historian Thomas Beckett Kane delivers a withering analysis of how the COVID-19 pandemic became not a public health crisis but a catastrophic failure of leadership science and reason Kane argues that the real virus wasn't SARS-CoV-2 it was the authoritarian impulse that seized control of American society From the funding of

dangerous gain of function research that created the virus to devastating lockdowns that destroyed millions of lives and livelihoods to a complicit media that amplified fear over facts this book exposes how a pandemic of experts inflicted more damage than the disease itself Drawing on extensive research and historical precedent Kane reveals how the same officials who funded the virus s creation became the architects of America s response how basic constitutional rights evaporated overnight and why the summer of 2020 s riots were the inevitable result of lockdown induced social collapse Most importantly he reveals the crisis representing a turning point in American democracy one that threatens the very foundations of individual liberty Bold uncompromising and meticulously documented *The Reckoning* is essential reading for anyone seeking to understand how fear conquered freedom and what it means for America s future This is the definitive account of our modern madness and a warning for generations to come Fuel Cells Detlef Stolten, Remzi C.
