Charles,James D. Slotta,Nathaniel Lasry,2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i e extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to

bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation

Beyond the Lecture Katie A. L. McAllister, 2021-04-01 Higher education is undergoing a reinvention More and more instruction is moving beyond the traditional lecture to include active learning and engagement supported by technology Without training many instructors simply continue to lecture but those wishing to develop their pedagogy can take action and move beyond passive methods of delivering content This book is essential reading for novice instructors for those wishing to shift from lecturing to active learning and for experienced educators wishing to examine their teaching practice A detailed discussion of academic research empowers instructors to examine develop and justify their approach to teaching The focus across topics rests on effective interactions and the overall classroom dynamic grounded in psychology the science of learning and perspectives on critical thinking Each chapter includes self assessments and things to try in order to understand current practice and develop the ability to promote student engagement foster critical thinking manage challenging behaviors and positively shape the classroom dynamic While the primary audience is the college or university instructor the key concepts and suggestions in this book are also appropriate for pre college teachers and for individuals interested in developing effective interpersonal interactions
