NASA Technical Memorandum ,1980 The impact of spending cuts on science and scientific research Great Britain: Parliament: House of Commons: Science and Technology Committee,2010-03-25 The pressure to be seen to be making cuts across the public sector is threatening to undermine both the Government's good record on investment in science and the economic recovery Whilst the contribution of a strong domestic science base is widely acknowledged methodological problems with quantifying its precise value to the economy mean that it is in danger of losing out in Whitehall negotiations Scientists are under increasing pressure to demonstrate the impact of their work and there is concern that areas without immediate technology applications are being undervalued The Committee believes the Government faced a strategic choice invest in areas with the greatest potential to influence and improve other areas of spending or make cuts of little significance now but that will have a devastating effect upon British science and the economy in the years to come **Documentation of Plasma Physics. Jr.,2017-03-16 Beyond Control reveals the Mississippi as a waterway of change unnaturally confined by ever larger levees and control structures During the great flood of 1973 the current scoured a hole beneath the main structure near Baton Rouge and enlarged a pre existing football field size crater That night the Mississippi River nearly changed its course for a shorter and steeper path to the sea Such a map changing reconfiguration of the country s largest river would bear national significance as well as disastrous consequences for New Orleans and towns like Morgan City at the mouth of the Atchafalaya River Since 1973 the US Army Corps of Engineers Control Complex at Old River has kept the Mississippi from jumping out of its historic channel and plunging through the Atchafalaya Basin to the Gulf of Mexico Beyond Control traces the history of this phenomenon beginning with a major channel shift around 3 000 years ago By the time European colonists began to explore the Lower Mississippi Valley a unique confluence of waterways had formed where the Red River joined the Mississippi and the Atchafalaya River flowed out into the Atchafalaya Basin A series of human alterations to this potentially volatile web of rivers starting with a bend cutoff in 1831 by Captain Henry Miller Shreve set the forces in motion for the Mississippi s move into the Atchafalaya Basin Told against the backdrop of the Lower Mississippi River s impending diversion the book s chapters chronicle historic floods rising flood crests a changing strategy for flood protection and competing interests in the management of the Old River outlet Beyond Control is both a history and a close look at an inexorable living process happening now in the twenty first century *Dam Failure Mechanisms and Risk Assessment* Limin Zhang,Ming Peng,Dongsheng Chang,Yao Xu,2016-06-13
