## FCAT 2.0 Reading

### Sample Questions

---

**Student Name** \_\_\_\_\_

The intent of these sample test materials is to orient teachers and students to the types of questions on FCAT 2.0 tests. By using these materials, students will become familiar with the types of items and response formats they will see on the actual test. The sample questions and answers are not intended to demonstrate the length of the actual test, nor should student responses be used as an indicator of student performance on the actual test. Additional information about test items can be found in the *FCAT 2.0 Test Item Specifications* at <http://fcit.fldoe.org/fcat2/itemspecs.asp>.

The FCAT 2.0 Reading tests and sample questions and answers are based on the 2007 Next Generation Sunshine State Standards.

The sample questions for students and the sample answers for teachers will only be available online, at <http://fcit.fldoe.org/fcat2/fcatitem.asp>.

#### **Directions for Answering the Reading Sample Questions**

The questions in this booklet are called multiple-choice questions. A multiple-choice question is followed by several answer choices. Read all the answer choices under each question and decide which answer is correct. You will fill in the bubble next to the answer choice you think is correct for each multiple-choice question. You will mark your answers in this book. If you don't understand a question, ask your teacher to explain it to you. Your teacher has the answers to the sample questions.

Do Accountability and Voucher Threats Improve Low-performing Schools? David N. Figlio, Cecilia Elena Rouse, 2008 We study the effects of the threat of school vouchers and school stigma in Florida on the performance of low performing schools using student level data from a subset of districts Estimates of the change in school level high stakes test scores from the first year of the reform are consistent with the early results used by the state of Florida to claim large scale improvements associated with the threat of voucher assignment However we also find that much of this estimated effect may be due to other factors While we estimate a small relative improvement in reading scores on the high stakes test for voucher threatened stigmatized schools we estimate a much smaller relative improvement on a lower stakes nationally norm referenced test Further the relative gains in reading scores are explained largely by changing student characteristics We find more evidence for a positive differential effect on math test scores on both the low and highstakes tests however the results from the lower stakes test appear primarily limited to students in the high stakes grade Finally we find some evidence that the relative improvements following the introduction of the A Plan by low performing schools were more due to the stigma of receiving the low grade rather than the threat of vouchers Abstract
