specifically military toolkit into a much more comprehensive integrated approach towards planning and executing In this forward looking report HCSS goes a step further by focusing not on the operational but on the strategic level of decision making Today this strategic layer is driven much more by domestic and international politicking than by creative strategic thinking This report advocates a new approach to strategic decision making which we label strategic design It summarizes and borrows some key insights from the design thinking literature in the business and public management literature and applies those to the security challenges surrounding stabilization efforts The report then illustrates this approach by developing and evaluating a few design sketches for new capability elements that even a small force provider like The Netherlands could start developing The report might be of interest to strategic planners and decision makers on both the military and civilians side *Representing the Nation* Pamela Erskine-Loftus, Mariam Al-Mulla, Victoria

Work Juan Pablo Bohoslavsky, Jernej Letnar Cernic, 2014-12-01 Poor public resource management and the global financial crisis curbing fundamental fiscal space millions thrown into poverty and authoritarian regimes running successful criminal

campaigns with the help of financial assistance are all phenomena that raise fundamental questions around finance and human rights. They also highlight the urgent need for more systematic and robust legal and economic thinking about sovereign finance and human rights. This edited collection aims to contribute to filling this gap by introducing novel legal theories and analyses of the links between sovereign debt and human rights from a variety of perspectives. These chapters include studies of financial complicity, UN sanctions, ethics, transitional justice, criminal law, insolvency proceedings, millennium development goals, global financial architecture, corporations, extraterritoriality, state of necessity, sovereign wealth and hedge funds, project financing, state responsibility, international financial institutions, the right to development, UN initiatives, litigation as well as case studies from Africa, Asia and Latin America. These chapters are then theorised by the editors in an introductory chapter. In July 2012 the UN Human Rights Council finally issued its own guidelines on foreign debt and human rights, yet much remains to be done to promote better understanding of the legal and economic implications of the interface between finance and human rights. This book will contribute to that understanding as well as help practitioners in their everyday work. The authors include world renowned lawyers and economists, experienced practitioners and officials from international organisations.

Journalism and the Nsa Revelations Adrienne Russell, Risto Kunelius, Heikki Heikkilä, Dmitry Yagodin, 2017-03-30 Edward Snowden's revelations about the mass surveillance capabilities of the US National Security Agency (NSA) and other security services triggered an ongoing debate about the relationship between privacy and security in the digital world. This discussion has been dispersed into a number of national platforms reflecting local political realities but also raising questions that cut across national public spheres. What does this debate tell us about the role of journalism in making sense of global events? This book looks at discussions of these debates in the mainstream media in the USA, United Kingdom, France, Germany, Russia and China. The chapters focus on editorials, commentaries and op eds and look at how opinion based journalism has negotiated key questions on the legitimacy of surveillance and its implications to security and privacy. The authors provide a thoughtful analysis of the possibilities and limits of transnational journalism at a crucial time of political and digital change.

KVS PGT Commerce Book Dheeraj Kumar Singh, **Women After All** Melvin Konner, 2015-03-02 A sparkling thought provoking account of sexual differences. Whether you're a man or a woman you'll find his conclusions gripping. Jared Diamond: There is a human genetic fluke that is surprisingly common due to a change in a key pair of chromosomes. In the normal condition the two look the same but in this disorder one is malformed and shrunken beyond recognition. The result is a shortened life span, higher mortality at all ages, an inability to reproduce, premature hair loss and brain defects, variously resulting in attention deficit, hyperactivity, conduct disorder, hypersexuality and an enormous excess of both outward and self directed aggression. It is called maleness. Melvin Konner traces the arc of evolution to explain the relationships between women and men. With patience and wit he explores the knotty question of whether men are necessary in the biological destiny of the human race. He draws on multiple colorful examples from the

natural world such as the mating habits of the octopus black widow angler fish and jacana and argues that maleness in humans is hardly necessary to the survival of the species In characteristically humorous and engaging prose Konner sheds light on our biologically different identities while noting the poignant exceptions that challenge the male female divide We meet hunter gatherers such as those in Botswana whose culture gave women a prominent place invented the working mother and respected women s voices around the fire Recent human history has upset this balance as a dense world of war fostered extreme male dominance But our species has been recovering over the past two centuries and an unstoppable move toward equality is afoot It will not be the end of men but it will be the end of male supremacy and a better wiser world for women and men alike
